30 YEARS SUPPLIER TO THE CANADIAN SPORTSMAN

Dear Sportsman, Dear Shooter, *JULY 1, 1986*

May I introduce you to our 1986-1987 catalogue. This is our 30th anniversary in the sporting goods business, and we do hope that you will keep this catalogue for some time and make good use of it.

It is said that "one is judged by the company one keeps". A fast glance through the pages will tell you what company we keep. Beretta, Baikal, Steyr, Diana, Rossi, El Gamo, Tikka, Victorinox, Voere, PMC — all names that are famous for their quality and integrity throughout the world. A recent new-comer to this distinguished club is "Daisy" of the United States, who celebrate their 100th year manufacturing B.B. guns and air guns.

The companies we represent have a combined total of over 1,500 years of manufacturing experience. 8 of them — Beretta 460 years, Baikal 250 years, Steyr 127 years, Victorinox 102 years, Daisy 100 years, Diana 96 years, El Gamo 96 years and Tikka 93 years — account for 1,324 years, indeed an outstanding achievement for all of them.

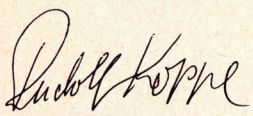
Why do we pay special attention to the time a company has been in business, and why should you? The answer is simple: honesty, integrity, reliability. It takes a total commitment by management and their employees to stay in business for any length of time. It takes decades of know-how and manufacturing experience to produce firearms that are both a flawlessly performing tool and a piece of art. It takes relentless drive in pursuit of excellence by the people in charge who chart the course and total dedication by all workers and mastercraftsmen in the company to achieve the best possible results, which in the end makes itself evident in a product superior to all others. Only then will a company become successful and gain momentum and be able to outdistance the competition. Only then will it make a mark for itself. Once a company has reached this goal, it is even more difficult to maintain this position. To be able to maintain it for 50 years is a great achievement, for 100 years is an outstanding achievement, for 460 years is just short of a miracle.

We in Ruko have a commitment to you, our customer, to bring you the best possible products at the best possible prices and back them up with service, even years after we have sold the product to you. That is why it is important that the manufacturers we buy from have a proven track record over many years. Only with the best of them do we feel confident that we can fullfill our promise to you, as we have done for the past 30 years.

Our catalogue comes to you directly and free of charge. We have tried to give you all the relevant information possible and we do hope that both the pictures and the information will convince you to go to your favourite dealer and take a look at the "real thing".

Whatever product you will choose, we will back it up with our service. We hope that it will bring you many hours of enjoyment of your favourite sport, and that one of our firearms, if you are a competitive shooter, will lead you to victory.

Yours sincerely,
RUKO OF CANADA LIMITED



R. Koppe
President

IMPORTANT NOTICE: Prices indicated are all suggested retail prices only. They are to serve as a general guideline and are not binding. Prices may be outdated before you receive this catalogue due to the constant flux of the Canadian dollar in relation to international currencies (swings of up to 40% in 6 months), and other factors which are beyond our control. Therefore, we reserve the right to change prices without prior notice.

Merchandise availability: We can not guarantee to the trade and the consumer that advertised merchandise will be available at all times. We also reserve the right to discontinue items without prior notice, or substitution.

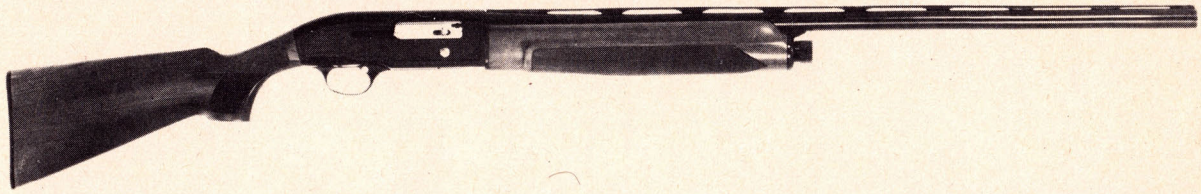
1956-1986
30 YEARS SUPPLIER TO THE CANADIAN SPORTSMAN
PRESENTS:

THE NEW "BERETTA 303" SEMI AUTOMATIC
THE ULTIMATE IN BEAUTY AND PERFORMANCE

"BERETTA 303" — You will treasure it for a lifetime.

The new "Beretta 303" is no doubt the most exciting shotgun that is being introduced to the Canadian shooter in 1985/1986. Styling and looks of the "303" are just super. A beautiful semi-beavertail fore-end of select European Walnut stepped off at the heel, and the trimmed-down deep blued receiver combine to give the new "303" a very elegant and classic look. Add a deep blued barrel with a high and extra wide 10mm (3/8") ventilated rib and cap it off with a select walnut pistol grip stock fitted with a deluxe ventilated recoil pad, and you have more features than in any other gun. A new pattern in checkering on the fore-end and pistol grip stock, plus a gold plated trigger and safety button, add luxury to beauty.
But it is not just luxury and beauty you get for your money. You also get performance. New technical improvements and innovations illustrated on this page, built on the solid foundation of the time proven and field tested "300 series," will not only guarantee you absolute trouble-free performance, they will keep the "Beretta Semi-Auto 303" leading the rest of the field for years to come.



The New 303 semi auto-loader shotgun is available in the following specifications:

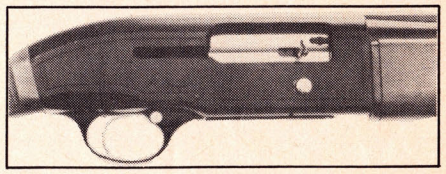
Beretta shotguns are setting new records, are winning more competitions than ever before. Barry Simpson of Great Britain won the individual gold medal at the World Championship of Sporting (FITASC) Clay Pigeon Shooting (Parcours de Chasse) held at Wynyard Park, Cleveland, England between May 30th and June 2nd, 1985.
This is just another of the many testimonials to the quality, precision and craftsmanship that are built into every Beretta shotgun.
You are a serious shooter, you want to make your hard-earned money count, your choice is Beretta. You can buy cheaper shotguns, but dollar for dollar, Beretta gives you more value than any other shotgun on the market.
Beretta full colour catalogue available at extra charge of $3.50.

Technical and Design innovations on the "New Beretta 303" Receiver

The shape of the receiver has been slightly modified, with the introduction of two tapering surfaces on the underside, rear of the trigger guard, both right and left; in addition to contributing to a more modern line, these improve the grip and facilitate a smooth insertion of the trigger finger into the guard.



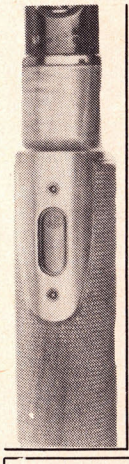
The A303 receiver has a simpler and more modern decoration machined into the receiver body, in substitution of the previous floral roll-engraving.

Trigger Guard
The trigger guard itself has been redesigned with a much more comfortable finger space in front of the trigger; the safety button is also new, and it will be agreed that altogether the effect is an improvement in both shooting comfort and looks.

Fore-end Cap
A further A303 improvement is in the fore-end cap (with swivel); this has been redesigned and strengthened for a better look and a safer screwing down in position.

Mobilchoke
The 303 mobilchoke is supplied with 3 chokes F, M, & IC, and a key for insertion and removal of the tube and cleaning of the threading inside the muzzle.

Choke Designations:
F Full = o, IM Improved Modified = oo, M Modified = ooo, IC Improved Cylinder = oooo, C Cylinder = Coooo, Skeet = s



Cut-off Lever
An exclusive feature: the cut-off, in a new, very original solution, has been incorporated in the redesigned fore-end. When required, the bolt can now be held in the open position by pressing the catch lever under the fore-end, and is released by easing back the cocking handle and letting it slide forward. This exclusive system is simple, practical and completely foolproof.

Mobilchoke
The A303 Mobilchoke has screw-in choke tubes (no outside tightening ring), disappearing inside the muzzle, exactly in the same fashion as our Mobilchoke Over-Unders. The A303 choke tubes are completely interchangeable with our Over-Under choke tubes.

SO4 Skeet

Watch out for the new breed of Beretta target busters: The magnificent Beretta S682's.
Trap, skeet, sporting.
Beretta S682
- engineered from Beretta's victories throughout the world.
Beretta S682
- featuring mechanical and functional innovations & developments.
Beretta S682
- providing exceptional versatility and durability through exacting attention to detail.
Beretta S682
- The result of over 300 years of gunsmithing excellence, combined with a relentless drive to improve, to innovate, to excel, to make the perfect gun, the best there is, and yet at a price you can afford.

Beretta "Numero Uno" - the gun that everybody talks about. The incomparable A303 Beretta semi-automatic - the gun that won the hearts of thousands of Canadian hunters.
The Universal Receiver: It takes both 3" magnum or 2¾" standard barrels, and the Beretta works smoothly regardless of the load. Cut-off lever makes exchange of ammo, and loading and unloading a cinch.

Advantages of the Beretta A303:
Rapidly interchangeable barrels.
Wide floating rib.
High accuracy and stability.
Extremely light recoil.
Reliable and safe cocking and firing mechanism.
A special locking mechanism to ensure that the gun can fire only with the bolt completely engaged in the barrel.
High durability of all components - made of special or stainless steel.
Easily adjustable stock drop.
Easy field-stripping for cleaning and inspection.

Beretta A303 Mobilechoke:
5 interchangeable choke tubes cover the whole range. They are housed in the bore, lined up perfectly to yield excellent accuracy and consistent patterns.

New Range of Beretta Side by Sides: 626ESST-627EELL
The most up to date and classic interpretation of the great traditional side by sides.
The new Beretta side by sides feature a concave rib, Anson type push button lock on fore-end. Totally enclosed, super strong receiver (firing mechanism is located in grooves machined into the lower part of the body). Problem-free coil spring firing mechanism and extremely fine and crisp trigger pull. An added safety feature is the second half cock on hammers, which eliminates the possibility of accidental discharge. Strong, wide extractors guarantee flawless ejection. Maintenance is simple as there are no screws used in the receiver - just 3 simple pins. Highest quality materials, latest technology and elegant design and unsurpassed craftsmanship make the 626 series one of the most sought after side by sides in decades.
Go and see them at your favourite dealer, or ask us for a full colour brochure.

S686L - S687L:
The new Beretta lightweights available with or without the new Beretta mobilechoke.
The new Beretta mobilechoke is a flush mounted screw in choke. The choke does not alter the traditional lines of the barrel, yet it allows a remarkably accurate choke to tube alignment. The chokes are available in full, extra full, improved modified, modified, improved cylinder, cylinder and skeet. This new system of chokes makes the 686L & 687L a truly universal shotgun.

Beretta barrels:
High quality steel - a tri-alloy of nickel, chromium and molybdenum - hardened and tempered to an extremely high maximum tensile stress point and elasticity limit, ensures maximum safety and gives the longest possible life to the gun. (This procedure is more expensive to work than steel normally used for barrels.)

Beretta.
Why nearly 500 years of family history is important to the firearm you buy today.

Imagine twelve generations of one family, devoted entirely to the making of a single product.

Over a span of nearly five centuries, they refined their product and simplified it; always making it more useful and efficient. Scores of lifetimes were spent developing new technologies, experimenting with new materials...finding better ways. Until today that family's product stands head and shoulders above others in its category; a wonder of craftsmanship, refinement and reliability.

And still the work goes on.

The name of the family is Beretta. Their product is firearms...for the world's hunters, competition shooters, law enforcement officers and the military. This is their story.

The Master Barrel Maker of Gardone.

His name was Bartolomeo Beretta.

Documents in the Venetian and Brescian State Archives trace his lifespan from 1490 to 1567. He was worthy of documentation in those early times because of his singular profession. In all of Italy, Bartolomeo Beretta was one of a handful of master barrel makers, crafting precious arquebus barrels for the fledgling firearms industry. On his passing, his son carried on the work.

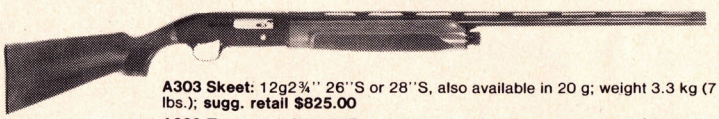
And so the Beretta tradition began.

Each succeeding generation of Berettas left its own distinctive mark on the family craft...a craft that rapidly grew into a flourishing business. Pietro Beretta (1791-1853) was the first full-fledged expansionist, who saw horizons beyond Italy for Beretta products. His son, Giuseppe (1840-1903) opened the first international markets. But it fell to Pietro Beretta (1870-1957) to give the company its present name and introduce modern production techniques...making Beretta the world's leading manufacturer of fine firearms.

And the Beretta reputation grew. Soon, millions of hunters, first armed with Beretta muzzle-loading shotguns, then with more modern side-by-sides and over-and-unders, and finally with Beretta automatic models were hunting game on all the world's continents. Beretta became the firearm of choice for law enforcement agencies and much of the world's military.

Factory expansion and modern production techniques are important to Beretta's remarkable success. But in the final analysis, it is Beretta's continued dedication to quality...the craftsmanship that set Bartolomeo Beretta apart from his 16th century competitors...that makes Beretta what it is today. Not just the world's oldest firearms manufacturer, but the oldest manufacturer of any kind under continuous family control.

Today the Beretta family motto remains simple and uncompromising: "If it bears the Beretta name, it will be the best."



A303 Skeet: 12g2¾" 26"S or 28"S, also available in 20 g; weight 3.3 kg (7¼ lbs.); **sugg. retail $825.00**

A303 Trap: 12g2¾" 30"F; weight 3.4 kg (7½ lbs.); **sugg. retail $850.00.** Not shown. Same as Skeet but with Trap Monte Carlo stock.

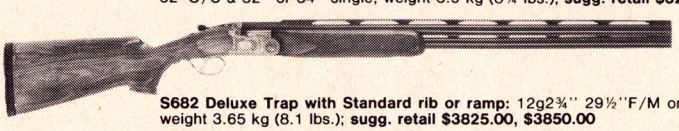
S682X Trap Mono with ramp: 12g2¾" 34"F or 32"F; weight 4.3 kg (9½ lbs.); **sugg. retail $2275.00.** 12g2¾" 34" or 32" Mobilchoke® with 5 chokes (F/IM/M/IC/C), weight 4.3 kg (9½ lbs.); **sugg. retail $2350.00**

S682X Trap Combo Mobilchoke® with 5 chokes w/ramp: 12g2¾" 29½"O/U & 32" or 34" single; weight 3.9 kg (8¾ lbs.); **sugg. retail $3200.00.** 12g2¾" 32"O/U & 32" or 34" single; weight 3.9 kg (8¾ lbs.); **sugg. retail $3200.00**



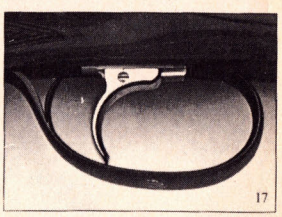
S682 Deluxe Trap with Standard rib or ramp: 12g2¾" 29½"F/M or F/IM; weight 3.65 kg (8.1 lbs.); **sugg. retail $3825.00, $3850.00**

S682 Deluxe Skeet & Sporting: Skeet: 12g2¾" 28"S/S or 26"S/S; weight 3.5 kg (7¾ lbs.); **sugg. retail $3825.00.** Sporting: 12g2¾" 28" Mobilchoke® w/5 chokes; weight 3.4 kg (7½ lbs.); **sugg. retail $3895.00.** Not shown.

Competition barrels
The S682 competition shotguns are manufactured with full length ventilated side ribs for better cooling during extended competition (picture 1). The high, ventilated top rib is also available as a stepped rib on S682 Trap model (picture 2). A 3mm x 13mm (.12 inch x .5 inch) luminescent front sight is standard.

Beretta is proud to present the very first competition shotgun to feature teflon ("Brunition") coated barrels. Matte finished to minimize glare, the teflon finish provides exceptional resistance to weather and abrasion.

Compact action
The S682's style is enhanced by the newly designed double fences and finely stippled receiver, which also helps to reduce glare. Tasteful engraving highlights the stylish hinge pins. Special hardening ensures resistance to wear and greater durability and reliability of internal components. Special chromium-plating provides an extremely high resistance to weather (pictures 3&4).

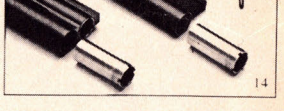


17

Adjustable trigger
The S682's innovative design also features a three position adjustable trigger. With 8mm (.32 inch) of travel, the trigger will adjust to the needs of most shooters (picture 5).

Stocks and forends
Shooters who wish to try stocks or forends of different configurations will appreciate the S682's easy interchangeability which requires only minor fitting. For those who wish to have a stock custom made, Beretta will provide semi-finished stocks.

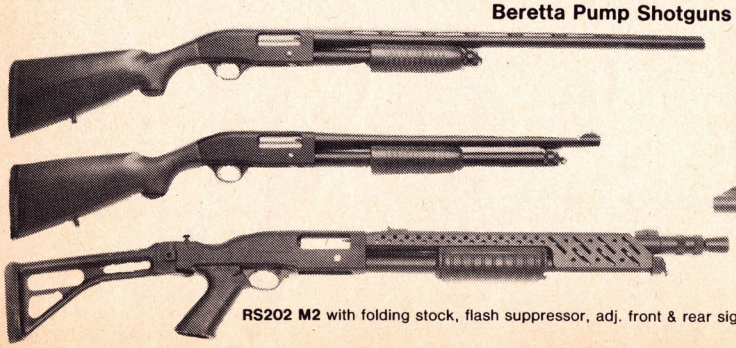
New Beretta Mobilchoke System:
Flush mounted screw-in type. Beretta shotguns in the 680 Over/Under Series and the 303 semi-automatics are available with the New Beretta Mobilchoke system. The chokes are completely interchangeable between Over/Unders & semi-autos.



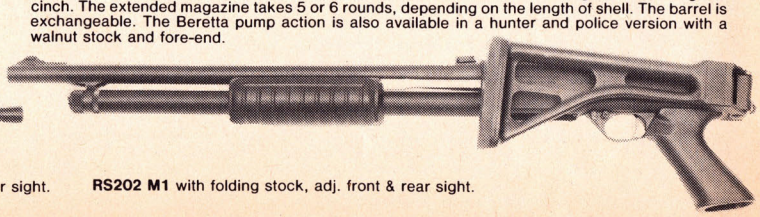
14

Beretta Pump Shotguns for the Hunter - for "Law Enforcement"

INTRODUCING THE "NEW BERETTA POLICE PUMP ACTION RIOT GUNS, M1 and M2:
Built with the identical tested and proven receiver, lock-up and firing mechanism that has made the now famous Beretta Semi-Automatic Shotgun a favourite with one million hunters and shooters around the world. Light, compact, practical, with a very smooth action, and easy to handle, the M1 and M2 will fire any 12 gauge 2¾" shotgun shell available on the market. Slide release allows easy removal of unfired cartridges from the chamber. Loading and unloading is a cinch. The extended magazine takes 5 or 6 rounds, depending on the length of shell. The barrel is exchangeable. The Beretta pump action is also available in a hunter and police version with a walnut stock and fore-end.



RS202 M2 with folding stock, flash suppressor, adj. front & rear sight.



RS202 M1 with folding stock, adj. front & rear sight.

your firearms seriously...you're ready for Beretta.

RUKO
1956-1986
30 YEARS SUPPLIER TO THE CANADIAN SPORTSMAN
PRESENTS

12g2¾"-30" any choking available 3.7 kg (8.2 lbs.) **sugg. retail $7000.00**
12g2¾"-30"-32" any choking available 3.7 kg (8.2 lbs.) **sugg. retail $9000.00**
12g2¾"-26"S/S-28"S/S any choking available 3.4 kg (7½ lbs.) **sugg. retail $7000.00**

Actions & Receivers:
The same high quality tri-alloy steel is used for actions and receivers. Case hardened and tempered by heat treatment, the strength of the action and receiver has a breaking point of 140 kg/mm², making the heart of the gun virtually indestructible.
The same quality of steel and process of heat treating is used for the "monobloc" double breech sleeve. A superior chrome plating technique protects the actions against corrosion.

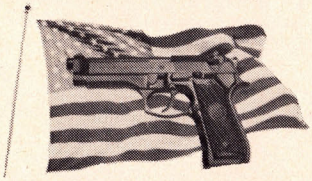
Teflon coated action and barrels on Model 682S
In the case of the new 682X Trap, Beretta introduces the very first competition shotgun to feature Teflon ("Bruniton") coated barrels and action. All other 682 Trap & Skeet guns feature the new Teflon ("Bruniton") coating in matte finish. Bruniton provides exceptional resistance to weather and abrasion.

Component Parts:
Components subject to highest wear and impact are made of tri-alloy steel, specially suited to case hardening. They are heat-treated to obtain great strength (approx. 140 kg/mm²) and an extremely hard wear resistant exterior (hardness above 700 Vickes). Firing pins of all models and connecting and operating rods for automatic shotguns are made of stainless steel with a strength of 150 kg/mm². The same is being used in the missile industry.

Beretta stocks and fore-ends:
A Beretta specialist travels the 4 corners of the globe for one reason only — to find and select the best quality walnut available, to secure tomorrow's demand today.
Exquisite hand checkering, luxurious oil or gloss finish, the perfect wood to metal fit, are all visible signs of Beretta's excellence in gunsmithing craftsmanship.

'NEWS FLASH'

Beretta pistol outguns world wide competition.
92SB (F) final choice of United States Armed Forces.



BERETTA 92F THE FIRST THE BEST

In early 1985, after years of exhaustive competitive testing, the U.S. military announced its choice of the Beretta 92F as the new sidearm for America's fighting men.
This success is just the latest in a long string of Beretta achievements. To date Beretta has sold more than a million over-and-under shotguns (plus a million semi-automatics). Beretta competition guns have won more gold medals worldwide than any other.

Specifications: 92F, 92F Compact

The Ruko-Tikka Adventure 1983-84-

The firm of Tikkakoski AB began to manufacture rifles for the Finnish Army in 1918. The Tikka-made rifles quickly gained a reputation for superior accuracy. This "superior" accuracy of Tikka Military rifles created an instant demand for hunting and target rifles.Tikka naturally filled the demand, with sporting rifles that have continued to bolster the firms reputation for accuracy among Scandinavian shooters and hunters.

Tikka rifles are built on the time proven Mauser-type action. The bolt has two strong locking lugs in the front, with the bolt handle acting as the third auxillary lug in the rear. The bolt head is completely recessed to enclose the base of the cartridge, except where the strong, claw-type extractor comes through the bolt head recess. The entire bolt is machined from a single piece of metal. The firing mechanism is one piece.

The entire receiver is also milled out of a single block of metal. There is no investment casting or stamping to cut costs. The trigger is fully adjustable for weight of pull and silent sliding safety is conveniently located on the right side. Each barrel is straightened by hand and the extremely smooth bore is cold hammered and free floating in the stock.

The stocks are made from straight grained European walnut. The forearm is large and contoured flat on the bottom. For a more comfortable hold the pistol hand checkered grip has a palm swell, something not found on most production rifles.

The final trimmings include a rosewood forend cap, grip cap, with white spacers and a rubber recoil pad also with white spacer.

The overall quality of a Tikka rifle reflects the pride and work Finnish craftsmen put into every gun.

New "Super Draw 1986"

A "MOOSE HUNTING " TRIP TO FINLAND WITH ALL EXPENSES PAID

One of the entries will draw this fantastic prize. Maybe it will be yours. Give it a chance. If you are in the market for a high power rifle, why not buy a Tikka now. Tikka rifles are famous for their pinpoint accuracy and flawless performance.

All you have to do is send us a copy of your purchase slip that clearly indicates your name and address, name of the store and address, date of purchase and the serial number of your Tikka rifle. In the last week of January, 1987, a draw will be made to select the winner. A skill testing question will have to be answered correctly by him/her.

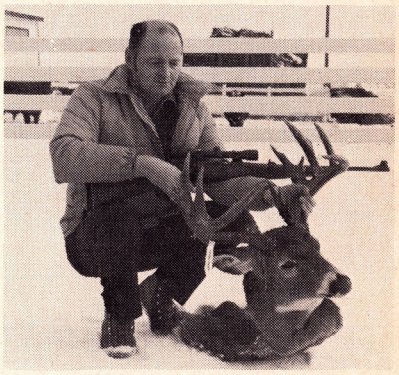
The Dealer who sold the winning rifle will receive a Tikka Deluxe rifle in his or her choice of caliber.

Please send your purchase slip to "Super Draw", c/o Ruko of Canada Limited, 7 Alpha Mills Rd., Mississauga, Ont. L5N 1H4.

Mr. Dan Menard, winner of the 1983 Ruko-Tikka contest, looking at unfinished walnut stocks during his visit to the plant.

Mr. Garnet Fortnum, first from the right, winner of the 1984 Ruko-Tikka contest, together with Pekka Tarvainen, sales manager for Tikka, out in the Finnish forest 300 miles north of Helsinki. Mr. Fortnum got his moose.

Mr. Marshall McLeod, winner of the 1985 Ruko-Tikka contest. He will participate in the hunt in Finland this year.



Common features to all Ruko-Tikka rifles:
Stock: all stocks are of select walnut, have palm swell on pistol grip, and recoil pad.
Magazine: metal clip magazine for fast reloading.
Trigger: all guns come with adjustable triggers 1-3 kg. (2.2 -6.6 lbs.).
Receivers: All receivers are grooved 17mm (21/32") and tapped for easy scope mounting.
Barrels: free floating on all Ruko-Tikka rifles.

30 YEARS SUPPLIER TO THE CANADIAN SPORTSMAN
PRESENTS:

The "Voere Titans"

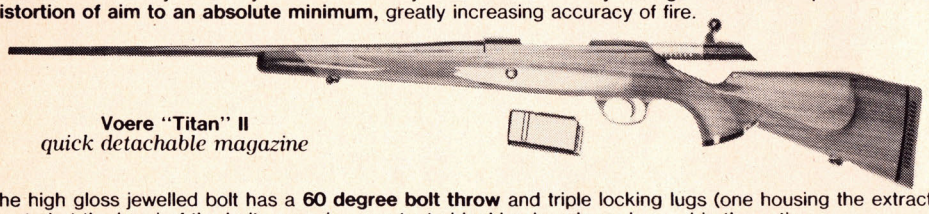
Modern design Powerful action Deadly accuracy

Accuracy, the single most important feature in a gun, always foremost in the mind of every marksman and every hunter. Accuracy of fire is the total sum of all the manufacturing processes. It represents the bottom line, it passes final judgement on those who created it. By its accuracy a gun is judged, as are those who made it.

Titan:

Other rifles have some features, the Voere Titans have them all. Modern design, powerful **K15** action with the fastest ignition time of any gun, deadly accuracy are the crowning achievements of Voere's master craftsmen.

The Titan's case hardened action features a powerful **jewelled bolt 23mm (⅞") in diameter and 209mm (8¼") long,** that houses patented **double cocking cams** delivering **the shortest** (3.5mm or 5/64") **and fastest** (0.0016 seconds) striker travel of any bolt action ever made. Striker and free falling firing pin are two separate parts and work very smoothly and 100% every time. This extremely fast ignition time keeps **vibration** and **distortion of aim to an absolute minimum,** greatly increasing accuracy of fire.



Voere "Titan" II
quick detachable magazine

The high gloss jewelled bolt has a **60 degree bolt throw** and triple locking lugs (one housing the extractor), located at the head of the bolt, engaging a patented locking lug sleeve housed in the action.

Bolt and sleeve are made of a steel chrome mangan alloy, giving it both tensile strength and correct hardness to ensure a 100% positive and torsion free lock up system, flush and tight with the cartridge head, ensuring the best possible use of the total powder load to achieve utmost velocity and consistent accuracy.

A velvet smooth finished **double length loading ramp** allows the bullet to slide into the chamber smoothly and gently, completely eliminating any scarring of the bullet tip or cartridge, thus again contributing to the accuracy of the shot.

There are many factors that add or detract from accuracy. The barrel, the bore, the rifling, the chamber, the lock up of the chamber, the feeding of the ammunition, the trigger weight and travel, the striker time and speed, the bedding. Aside from accuracy, a gun is to work smoothly and flawlessly under any conditions. It must be safe to handle.

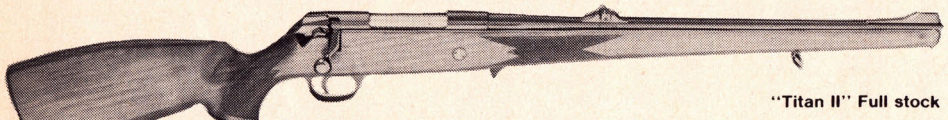
Voere took great pains to excel in all points.

Extra heavy recoil lug and shoulder crossbolt support. The free-floating barrelled receiver is solidly bedded to the stock by two 6mm (¼") bolts. The front bolt tightens into the recoil lug. A heavy duty 8mm (5/16") crossbolt gives extra support to the recoil shoulder, ensuring consistent shot to shot accuracy and eliminating stock damage.

Trigger: The "Titan" is supplied with a single adjustable trigger (0.85-2.5 kg or 1.88-5.5 lbs.) with a **triple safety, blocking the trigger, sear, and bolt handle lift.** Single set or double set triggers are available on request.

The stock features a **semi Monte Carlo stock** with a cheek rest, and tapers off towards the heel. It is finished off with a butt plate and a 19mm (¾") ventilated recoil pad. Checkering on pistol grip and fore-end are hand finished. The pistol grip has a palm swell on the right hand side that gives better control of aim. The dark rosewood tip on fore-end and pistol grip cap provide an elegant contrast to the high gloss or oiled finish of special selected European walnut. Deep lustre bluing of barrel and action, and the jewelled bolt add to the beauty of the "Titan" rifle. 25.4mm (1") sling swivels come with every rifle.

Whether it is the accuracy of fire, the smooth and flawless function of the Voere action, or the beautiful finish of both barrelled action and stock, we do not think that this gun can be improved upon. We dare not tamper with the creation of master craftsmen of the Voere factory. We deliver it to you in its original state.



"Titan II" Full stock

"Titan Menor" grooved 11mm (7/16") and tapped for scope mounting.

"Titan Match" with adjustable recoil pad, comes in repeater or single shot. Cal. .308.

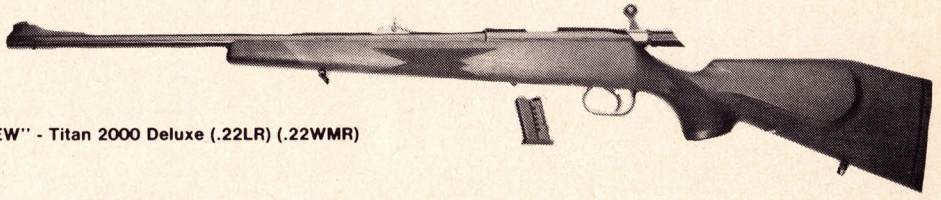
"We service what we sell"

the New "Titan 2000 Series"

- ***.22 cal. bolt action Repeaters***
- ***Probably the most accurate .22 cal. bolt action repeater you ever shot***
- ***The best built .22 cal. bolt action you ever owned . . .***

The Titan 2000 is the spitting image of the bigger brother, the "Titan II" highpower - the gun that has won the hearts of many a serious marksman.



"NEW" - Titan 2000 Deluxe (.22LR) (.22WMR)

The barrel is of chrome Vanadium barrel steel, 6 grooves and chamber cold hammer forged to precise tolerances and a mirror-like finish. Voere designed a new bolt based on the Titan II principle, but with two offset locking lugs in the head, instead of Titan's 3. The lugs engage the lug sleeve inserted into the action right behind the chamber, ensuring a very tight lock up. The offset locking lugs allow the clip magazine to protrude high into the action, bringing the top cartridge right in line with the chamber. The bolt moving forward picks up the cartridge and pushes it straight (not at an angle) into the chamber. There is absolutely no possibility that the lead bullet could ever be scratched. The bolt locks the chamber tight. The short striker (Voere's patented feature used in the Titan II) is also used in the "2000". The single trigger is adjustable for creep and pull (0.8 - 1.8 kg - 1.88 - 4 lbs.) Single set or double set triggers can be supplied on special request at extra charge. The trigger adjustment screws are easily accessible by removing 2 screws that hold the floor plate and trigger guard (not the complete action). The two screws tighten into threaded steel sleeves inserted into the stock.

When Voere set out to manufacture a new .22 cal. bolt action rifle, it was not their aim to simply add yet another rifle to the already existing army of .22 cal. rifles, nor did they aim for a bargain basement priced product. Quite the contrary. After a great amount of research and design was done, Voere's gunmakers took the very best materials, the very latest manufacturing equipment, and built a rifle that will lead the field in design and innovations, as well as quality and accuracy, for some time to come.

As you do not have to remove the action from the stock, it saves the extra time and effort to sight the rifle after every trigger adjustment. Two 6mm (¼") bolts hold the action against metal bolt sleeves inserted into the stock, preventing the wood from being compressed between the bolt head and action. One bolt tightens into the action, the other into the recoil lug. A metal plate just forward of the action serves as a bearing point for the barrel. The sliding safety has the same triple function as in the Titan II.

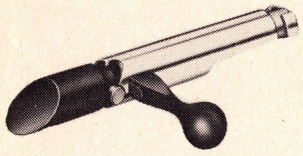
The stock is of European walnut, oil finish, with rosewood tip, with hand checkering on pistol grip and fore-end. The pistol grip has a palm swell on the right hand side.

Sights: 2.5mm square roof front sight inserted into front ramp. Notched leaf rear sight with windage adjustment. The receiver is grooved and tapped for scope mounts or diopter sights.

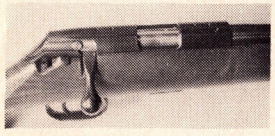
The rifle is also available in .22 WMR caliber. Model number is 2020.

Both models are available in European selected walnut, high gloss finish, without sights.

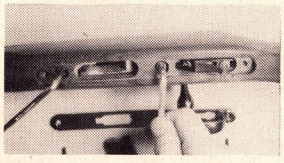
"Titan Match" with adjustable recoil pad, repeater or single shot. Cal. .222, .223. Other calibres on request.



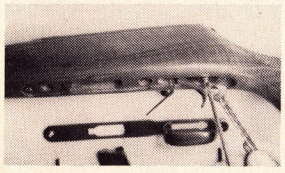
Bolt for Titan 2000 with two locking lugs.



Receiver of Titan 2000, grooved 11mm (7/16") and tapped for scope mounting (distance of holes 12.7mm - ½").
Silent sliding safety.



Trigger adjustment (floor plate removed).



Floor plate removed, showing 4 threaded steel sleeves inserted into the stock.

PRESENTS:

The Aristocrat in Highpower Rifles

(Quick detachable clip magazine)

Quality - consistent, enduring quality - is one of the most difficult of all things to obtain. Quality of this kind is not a casual or occasional achievement, but is the direct result of years, sometimes decades, of inspiration and dedicated effort, striving for perfection. Today, as they have always been, Mannlicher rifles are the product of careful, skilled and inspired hands and minds. Dedicated Austrian craftsmen working with the finest high alloy ordinance steels and select European walnut to give the sportsman the finest rifle available anywhere in the world. This is the Steyr Mannlicher tradition, a 125 year old tradition of high quality, amazing accuracy and rugged dependability.

Whichever Steyr Mannlicher rifle you choose, you will be impressed by its distinct spiral tapered Mannlicher barrel. Cold hammer forged inside and out, guaranteeing consistent accuracy. You will also like the smooth crisp trigger pull or double set triggers depending upon your choice. Each rifle is fitted with a sunken detachable rotary magazine. The non-rotating bolt is smooth, and quiet, featuring six rear locking lugs, throw is 60°, permitting low scope mountings.

bull barrel scope rail front tunnel sight & peepsight**

Left handed rifles for the left handed sportsmen. Steyr is one of a very few companies who still produce a truly left handed action and stock for you, the left handed shooter. There are 3 calibers available in 2 very beautiful guns (see chart).

Steyr-Mannlicher Model M "Professional". The Model M "Professional", the rough and tough rifle that can take it all. It will endure the storms, the cold, the heat. Whenever you need it, it will function flawlessly.

Designations of Models: SL - Super Light; L - Light; M - Medium; S - Heavy; ST - Super Strong.

The synthetic stock (cycolac), used and tested by the military, is lighter than wood. But it does not dry out, swell, break, crack or warp to throw the gun barrel out of line. It will perform whenever you want it to. It's not a fancy rifle, but one you can count on, one you can depend on year in and year out.

The Professional can be delivered with parkerized finish in caliber .270 Win. and 30-06 Spr.

Unparkerized in all other models listed in this ad.

STEYR AUG-SA UNIVERSAL .223 (5.56mm Nato) SEMI AUTOMATIC SPORT/SURVIVAL CARBINE

STEYR MANNLICHER

Steyr-Mannlicher

125 years of consistent, enduring quality

The Gun of the Year 2000

The gun of the year "2000" is here today. The AUG is the end product of a new revolutionary concept in manufacturing and design of firearms. Years of intensive research by Steyr engineers and the Austrian Army have created a Sport/Survival gun that incorporates all of the advanced military refinements in a new semi automatic version for the sportsman.

Compact size, weight and balance, accuracy, field reliability, simplicity in design are a must for a soldier or sportsman. The AUG excels in all of them. The unique bull-pup design reduced the overall length to only 31", yet it houses a 20" 6-groove, hammer forged barrel, featuring machined radial cooling fins and flash suppressor. The chamber is chrome lined. The AUG strips down into six modular part groups for easy cleaning and maintenance.

The rigid aluminum cast carrying handle serves as front and rear scope mounts and houses a 1.5X optical sight with a circular reticle, which makes it easy to home in on the target. Extra large trigger guard lets you use your gloves in cold weather. The forward hand grip pivots into vertical position for firing. A cross bolt blocks the trigger.

The AUG stock is fitted with two ejection parts, left and right. Left handers can order the AUG with a left handed bolt at no extra charge. The staggered 30-round box magazine is made out of the same high-impact plastic resin as the unique AUG stock.

The transparent magazine lets you see the amount of rounds left in your magazine. Virtually unbreakable, the magazine has withstood the weight of a jeep without signs of any functional damages.

Futuristic design: the latest state of the art in space age material, functional reliability, accuracy and field mobility.

If you look for a gun that has all these attributes, AUG is the answer. AUG excels in all of them.

Ruko® of Canada Limited
Exclusive Canadian distributor for all Steyr Firearms

MORE THAN 58 COUNTRIES & 70 U.S. LAW ENFORCEMENT AGENCIES CHOSE THE STEYR "SSG" MANNLICHER RIFLE

SAFETY
Military-type three position safety.

BOLT
Teflon-coated to eliminate binding in extreme weather conditions.

LUGS
Six heavy-duty rear-locking lugs.

BOLT HANDLE
Butter-knife bolt handle, especially designed for speed reloading.

COCKING INDICATOR
Shows when firing pin is cocked.

SCOPE MOUNTS
Optional parkerized NATO-standard quick-detachable mounts can accommodate any U.S. — or foreign-made 1-inch tube optics.

BARREL SEAT
Barrel is pressed (with a pressure of more than 10 tons). 2.5 inches into the heavy-duty receiver, achieving stability and eliminating barrel vibration.

ACTION
Heavy-duty right-handed action with a closed front and rear bridge offers shooters the utmost in safety and strength. Features an integral dovetailed, NATO-standard scope-mounting system.

BARREL
26-inch, medium-heavy barrel, free-floating, cold-hammered, chrome-lined tapered bore; twist one turn in 12 inches.

SLANTED REAR SIGHT
Adjustable for windage.

MUZZLE
Crowned for match performance and protected with a muzzle cap (furnished).

FRONT SIGHT
Adjustable for elevation, the ramp-mounted blade is hooded for protection.

Model SSG Sport cal. .308

TRIGGER
Fully external, adjustable, crisp single trigger. Slack and trigger pressure are adjustable from 2.5 to 4.7 pounds.

SWIVELS
1" swivels.

MAGAZINE
Macrolon rotary magazine with five-round capacity. (NOTE: Magazine holds cartridges at the shoulder, preventing damage to bullet tips and allowing smooth loading and straight-line feeding — a well-known characteristic of Mannlicher rifles.)

FINISH
Non-glare parkerized finish for better metal protection and easier maintenance.

EXCLUSIVITY
The SSG is an original Steyr Mannlicher product, lovingly built by a respected company manufacturing arms for more than 300 years and known the world for the quality of its products, workmanship and technological innovation.

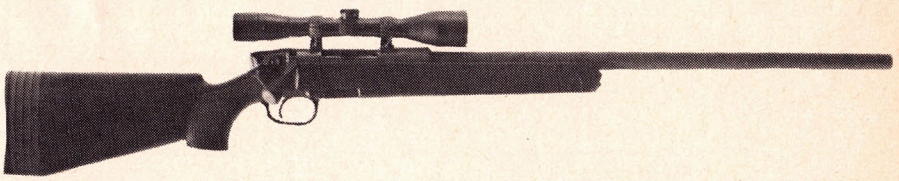
PRICE
The SSG offers features and advantages found only in high-priced custom-made target rifles. *No other production rifle can compare with it — at any price.*

TRIGGER GUARD MAGAZINE HOUSING
Made of aerospace-developed Macrolon to achieve light weight, to eliminate rust and to guarantee durability. (This material retains its shape between 235° above zero and 230° below zero.)

PERFORMANCE
Consistent grouping within one minute of angle at 300 yards is a traditional Mannlicher characteristic.

STOCK
The BAS Cycolac stock has no personality, but it performs in the worst of best conditions. Insensitive to cold and hot climates, it is tougher than nails to boot.

SPACERS
Removable spacers allow length of pull to be adjusted between 12.5 and 15 inches, thus enabling the SSG to be fitted to shooters of all statures permitting proper scope eye-relief.



Model SSG Police cal. .308 black stock walnut scope (New 1985-1986)

The SSG

Fitted with its hooded blade front sight and slanted leaf rear sight, the SSG is a superb rifle with unparalleled accuracy. This precision-made bolt-action rifle provides a hair-splitting accuracy that must be seen to be believed. Chambered for the 7.62 NATO round (also called the .308 Winchester) of proven power and with its 26-inch barrel, this beauty weighs in at 8.6 pounds (10 pounds with scope). Overall length, 44.5 inches.

To accommodate marksmen of various statures, removable spacers have been built into the butt section of the virtually indestructible ABS Cycolac stock. Ten-shot magazines of Macrolon are available.

STEYR-SSG POLICE:

The new Steyr-SSG Police is an improved version of the Steyr SSG. While retaining the well-known advantages of the SSG, additional improvements were made specially for the special use of law enforcement officers. The most important differences are:

- black coloured stock
- heavy match barrel for high accuracy and extremely long barrel life
- new match bolt handle for quick reloading
- detachable shooting sling mounted on a rail so that position can be variated
- sensitive set trigger to guarantee smallest possible trigger weight if desired

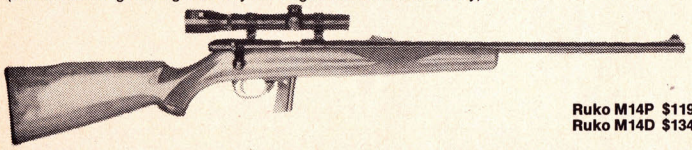
RUKO FIREARMS - FOR YOU - THE

RUKO®
1956-1986
30 YEARS SUPPLIER TO THE CANADIAN SPORTSMAN
PRESENTS:

Quality
Reliability
Economy
Service

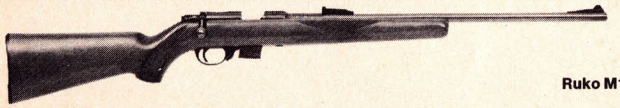
RUKO .22 CAL. LR & .22 CAL. WIN. MAG. RIMFIRES
Ruko .22 caliber rifles in traditional classic styling in standard and deluxe version, featuring full length tapered barrels, grooved receivers, adjustable (windage & elevation) rear sights, thumb safety, hand checkered (Deluxe) fore-end and pistol grip, shell deflectors on semi-automatics. A super value at a very reasonable price. Use high velocity ammo only in all semi-automatics.

RUKO .22 CAL. BOLT AND SEMI-AUTOMATIC RIMFIRE RIFLES
(use cal. .22 long rifle high velocity cartridges in all semi-autos only)



Ruko M14P $119.95
Ruko M14D $134.50

The **Model 14P** bolt actiion and the Model 20P semi-automatic are crafted in simple, yet tasteful, styling. With plain walnut-finished stock, blued barrel and easy mounting scope groove, these two most reasonably priced rifles are extremely reliable companions for hunting varmit, small game, for plinking and target shooting. They are one of the most affordable and durable guns on the market today.
Ruko M14D .22 L.R. is the deluxe version of the model 14P. It features elegant hand-checkered, walnut finished stock made of Philippine Mahogany, an adjustable rear sight and beaded ramp front sight.



Ruko M1500 $184.50

Ruko M1500 .22 Magnum Rimfire is the perfect rifle for the shooter who likes the heft and feel of a more powerful rifle. With a handsome hand-checkered walnut finished stock, this beautifully-styled rifle boasts of a smooth bolt-action system with double lugs to insure endurance and safety. Additional features include a barrel made from high-grade ordinance steel, beaded ramp front sight and adjustable rear sight block.

Ruko M1800 $298.50

Ruko M1800: Expertly crafted and designed, the 1800 is chambered for .22 Hornet. Featuring a classic Monte Carlo comb stock with cheek-piece, double lug and 5-shot capacity, this excellent firearm will surely provide the discerning shooter with year round pleasure. The very low price makes it affordable to every hunter and sportsman.

.22 CAL. SEMI-AUTO LOADERS

Ruko M20P $119.95

Ruko M20P - probably one of the best bargains you can find in semi-automatics today. Extremely reliable, it features hooded front sight, elevation adjustable rear sight, and grooved receiver. The stock is of walnut-finished Mahogany. 15-shot clip magazine.

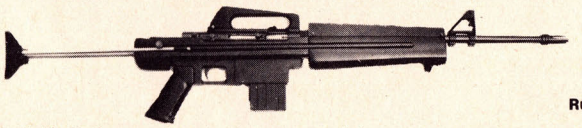
Ruko M2000 $129.95

Ruko M2000 is the Deluxe version of the extremely popular model 20P. Chambered for .22 L.R. high velocity cartridges, it features an elegant hand-checkered walnut-finished Philippine Mahogany stock, deluxe adjustable rear sight and beaded ramp front sight. An excellent value for the price.

"New for 1986"

Ruko M16 $169.95
Ruko M1600C $279.50

M1600C is the latest version of the famous Armalite M16. Patterned more closely in appearance, the M1600C is an excellent training rifle for cadet or troop marksmanship, using less expensive .22 L.R. high velocity ammunition. With its superb functional capabilities, it also provides great enjoyment to the hunter and sportsman. The stock and the forearm are made of the exact fibreglass contours of the Armalite M16. The cocking mechanism is likewise a replica. This semi auto-loader features a fully adjustable front post sight for elevation and rear peep sight adjustable for windage. Precision machined full length tapered barrel has muzzle brake and flash suppressor. If you remove the carrying handle you will find a grooved receiver for easy scope mounting. Complete with carrying sling and a 15-shot clip magazine, the Ruko M1600C makes a fine sporting and survival gun.



Ruko M16R $179.95

Ruko M16R: Same as above but with spring loaded retractable stock and ventilated shroud.

AK22 $229.95
"New" for 1986

Designed to be an almost exact look-alike of the Kalashnikov rifle, the Ruko AK22 follows the same basic appearance of its Russian counterpart. The uniqueness of this rifle, chambered for .22 L.R. high velocity ammunition, makes plinking and target shooting exciting and easy on the wallet. The Ruko AK22 features front post and a rear sight adjustable for windage and elevation. Forend grip and stock are of Mahogany in plain finish. Gun comes complete with swivels, sling and detachable cleaning rod.

"New" for 1986 Pump action shotguns
Excellent quality at very low prices

Model 30D, 30R and 30DG are the latest and very much improved pump shotguns made for us by Arms Corp. All models feature solid steel receivers, milled from a solid block of high carbon steel, machined to exact tolerances. A great improvement are double slide cocking bars that ensure smooth and reliable pump action. Well balanced and fast pointing, the look of the pumps have been greatly improved by a newly designed fore-end and exquisite hand checkering on fore-end and pistol grip. The Mahogany fore-end and stock have a beautiful walnut finish.

Performance, versatility and economy at an unbeatable price.

"New for 1986" **Ruko-M30D 12 gauge Deluxe Pump Shotgun**
Sugg. retail $239.95

Ruko-M30R 12 gauge Riot gun, 6 or 8 rounds
Sugg. retail $245.00

The high carbon steel receivers and double slide bars make the M30R and M30DG highly reliable pump action riot guns.

Ruko-M30DG 12 gauge Deer Hunter w/slug barrel, 6 or 8 rounds.
Sugg. retail $245.00

Two additional features, a hooded front sight and fully adjustable rear sight, make the 30DG an excellent slug gun for deer hunters.

Ruko Shogun 10 gauge 3½" chamber Long Range

Ruko Shogun "10 gauge" Long Range

Specially designed for hunting large birds at long range, this gun is built to perform with those powerful 10 gauge loads. The Anson & Deeley type action and parts are forged and heat treated. Double underlocking lugs and extra heavy hinge pin secure the barrel (forged, heat treated and chrome lines) to the action. The gun features a solid matted rib, double triggers and automatic safety and 1" recoil pad. Fine hand checkered and glossy finished beavertail fore-end and pistol grip stock are made from selected European walnut. Engraving on the chromed receiver adds to the beauty of the gun. **$695.00**

RUKO .22 CAL. & .22 CAL. WIN. MAG. LEVER ACTIONS

Model EG712 .22 LR/EG73 .22 Win. Mag.

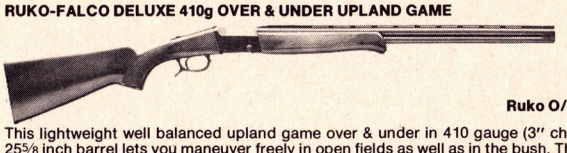
Ruko Erma lever action precision crafted in West Germany. The outstanding feature of this gun is the butter smooth cocking operation of the short throw lever. From the hooded blade front sight, adjustable lever rear sight to the deep lustre bluing of barrel and action, everything on this gun conveys the care and quality of gunsmithing excellence. Fore-end and stock are beechwood with walnut finish (also available in walnut). The high lustre deep blued receiver is grooved (11mm, 7/16") for easy scope mounting.
EG712 .22 LR **$355.00** **EG73** .22 Win. Mag. **$365.00**

RUKO .22 CAL. LR & .22 CAL. WIN. MAG. SEMI-AUTO LOADER REPLICAS

Model EM1 .22 LR semi-automatic
blow back system/ESG22 .22 Win. Mag.

A precision quality replica of the world famous M1, the Ruko Erma military style semi-automatic is built with the same care as the lever actions. Features military style front sight and peep type rear sight, adjustable for windage and elevation. Stock is of beechwood with walnut finish. Magazines available: .22 LR - 5, 10, 15 shot. .22 Win. Mag. - 5, 12 shot. **$309.50**
EM1 .22 LR **$309.50** **ESG22** .22 Win. Mag. **$499.50**

RUKO-FALCO DELUXE 410g OVER & UNDER UPLAND GAME



Ruko O/U Deluxe 410 gauge:

This lightweight well balanced upland game over & under in 410 gauge (3" chamber) with its short 25⅝ inch barrel lets you maneuver freely in open fields as well as in the bush. The unique under lever cocks the firing pin and opens the breech lock in one stroke. Deluxe features such as hand checkered Italian walnut pistol grip and stock, raised ventilated rib, deep bluing of barrels and modern design machined action make this Ruko over & under a truly beautiful gun. Automatic safety, sling swivels and butt plate are standard features. **$319.50**

RUKO-FALCO FOLDING 410g SIDE BY SIDE UPLAND GAME

Ruko Folding Side by Side 410 gauge 3" (76mm) Chamber:

Has the same underlever mechanism as the over & under. Walnut finished birchwood fore-end and pistol grip stock on this standard model are hand checkered. Double trigger mechanism is crisp and smooth. Comes with manual safety and sling swivels. **$199.50**

"New for 1986"

ROSSI GALLERY RIFLES & CARBINES:
The great old guns from the good old days. We have brought them for you.
Rossi Gallery Pump has been a perennial favourite of marksmen, small game hunters and just plain plinkers. Probably the most widely used, most trusted small bore rifle design ever produced, it is still going strong after more than three-quarters of a century. Excellent balance, crisp fast handling, and extremely safe design make it the ideal gun for the young marksman.
The super smooth slide action delivers both speed and reliability, comes in a deep blue luster or in weather resistant nickel finish, barrels have 6 grooves, roof front sight and V-notched rear sight adjustable for windage and elevation. All stocks are of beautifully grained Brazilian hardwood. The guns are designed for fast simple take down, easy cleaning and safe storage.
Whether you choose a 16½" or 23" barrel; blued or nickel plating, .22 LR or .22 magnum, we are sure the looks & feel of the gallery pump will please you and give you hours and hours of enjoyment. It will look great on your gunrack.
We have just introduced the traditional old-style Gallery rifle, octagonal barrel in .22 LR, 584mm (23") barrel. A real beauty you'd like to own and treasure for a life-time.
RO-1 Scope mount — specifically made for Rossi pump by Rossi for 1" scope tubes (25.4mm). Sugg. Retail $24.95 (available at end of 1986)

PUMA SADDLE RING CARBINE:
The perfect "brush" gun and a true carbine in the purest sense.
The Puma measures 37" from muzzle to butt plate and weighs only pounds. This fast handling short stroke lever action carbine has all the rugged qualities, proven design and reliability of the old work-horse of the range, the gun that won the West.
The all steel internal component parts are precisely machined for smooth, trouble-free operation. Each gun features blade type front sight, adjustable rear sight (windage & elevation), half cock safety double lever lock, curved steel butt, and saddle ring. Walnut finish Brazilian hardwood stock and deep blue lustre barrels and receiver make it a truly beautiful gun.
It is now available in three popular calibers: .357 Magnum (or .38 Spec.), the new .44 Magnum version, and the all-time favourite .44/40 caliber.
See them at your favourite dealer now.

THE OVERLAND COACH GUN:
A favourite with hunters and lawmen in the last century, the trusted and dependable companion to many a stage coach rider.
Good old fashioned reliability, ruggedness, traditional classic lines of exposed double barrel shotguns updated to handle modern high velocity loads, combined with simplicity of action and the obvious safety advantages of exposed hammer design. The Overland Coach Gun is still a favourite with today's hunter and sportsman.
The Overland Coach Gun features raised, matted sighting rib, Brazilian hardwood pistol grip stock and beavertail fore-end, sling swivels, high lustre bluing of barrels, hammers, triggers, locking lever and receiver. All interior parts are precision machined and fitted to give you smooth and flawless performance.
Chambered for 70mm (2¾") and 76mm (3" magnum) shells, the Overland is built for the toughest, most demanding use a hunter can ask for. A real work-horse in the field.

BONANZA HAMMERLESS SIDE BY SIDE:
A classic smooth handling well balanced hammerless side by side shotgun with the sleek styling and high lustre blue finish of more expensive shotguns. The Bonanza is the result of up to date technological advances combined with meticulous craftsmanship.
Each gun features standard extractors, double trigger, a strong monobloc receiver, automatic tang safety, sling swivels, massive twin underlugs with synchronized sliding bolts for double safety lockup. Raised, matted antiglare sighting rib ensures fast and sure aim. Brazilian hardwood walnut finish beavertail fore-end and stock are meticulously hand fitted to the high lustre blued barrels and receiver.
The Bonanza comes in 12g, 20g and 410g, and will take both 2¾" and 3" Magnum shells.

ROSSI POMBA, The classic single barrel shotgun:
A single shot outside hammer shotgun designed to give years of unfailing performance. Easy to cock exterior hammer, standard extractors, strong all steel receiver, half cock safety, strong cross breech lock, quick detachable beavertail fore-end and sling swivels are some of the features of the Rossi Pomba. Deep blue, high lustre bluing of barrel and receiver, combined with walnut finished Brazilian hardwood pistol grip stock and beavertail fore-end give the Pomba the classic look of the "old-timer single barrel".
Easy handling of the breech locking lever and exterior hammers make this light and well balanced shotgun a perfect choice for the young hunter and for everyone who is looking for a simple, rugged and reliable single barrel.
Comes in 12g, 20g and 410g, all chambered to take 3" magnum shells.

Model 88

STAINLESS: Model 87, 88 & 89
A brilliant new addition to the family of fine firearms from Rossi. Precision machined from 440 stainless steel for superior tensile strength, the gun is 100% weather and corosion proof. Except for the positive coil spring, all other internal parts are made from this rust resistant stainless steel, providing satin-smooth lock-work.
Rossi's attention to detail in assembly and final finish has resulted in super smooth and crisp double action trigger pull, clean edges and precision fit between all integrating parts. The 80's are some of the best and sleekest small frame revolvers available on the world market today. These Stainless Model 80's incorporate all the special features of the Champion and Pioneer revolvers, including adjustable rear sight (windage) in Models 88 & 89. Model 87 has a notched rear sight in the frame.

RUKO®

1956-1986
30 YEARS SUPPLIER TO THE CANADIAN SPORTSMAN PRESENTS:

RUKO

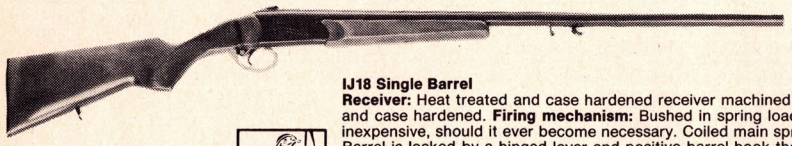
. . . "Extra ordinary guns . . .

"Baikal"

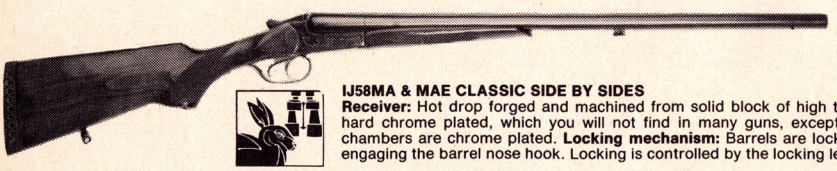
You cannot find a better gun . . .

No matter how long you search, or where. We make this statement with conviction because Baikal guns have features that you will only find in guns selling for double or triple the price.
Only expensive guns have case hardened receivers, precision machined and hot drop forged from a solid block of high tensile alloy steel. All Baikal shotguns do, including the IJ18 single barrel.
Only very expensive shotguns feature internal action locking, trigger and firing mechanism finely tuned and hand fitted from case hardened and hard chrome plated parts. Baikal Side by Sides and Over & Unders do.
Chrome plated bore and chamber, and the superior latch type locking system on the beavertail fore-end only found in expensive guns are standard with every Baikal, even the single barrel. So are the sling swivels.

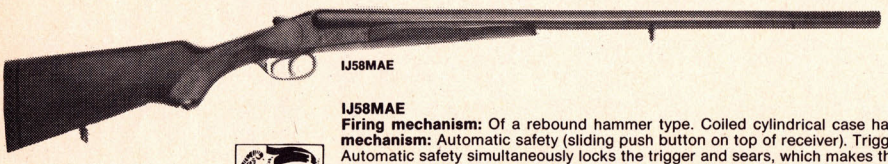
The spring that activates the hammer is a tempered cylindrical coil spring, guaranteeing a positive strike every time. All Baikal guns have this feature.
Extractor system that lets you switch from extractor to ejector or vice versa by simply pushing a lever or turning two selector pins. If you find this system at all, the gun will cost more than a Baikal, we are sure of that.
Uncocking a cocked gun without dry firing: Every Baikal has this feature, even the single shot. You need no dummy shells. You need not ruin your firing pins and mechanism. Dry firing your gun becomes obsolete with a Baikal shotgun.
Convinced? Let's examine the guns one by one and look at the extras.



IJ18 Single Barrel
Receiver: Heat treated and case hardened receiver machined from solid block of steel. **Parts** machined and hand finished from high tensile alloy steels, and case hardened. **Firing mechanism:** Bushed in spring loaded hard chrome plate firing pin separate from the hammer makes replacement easy and inexpensive, should it ever become necessary. Coiled main spring will operate under any temperature and is bound to last forever. **Locking mechanism:** Barrel is locked by a hinged lever and positive barrel hook that engages the barrel in the lower part of the receiver. **Safety mechanism:** Non-automatic safety (button behind trigger) locks the trigger. An additional safety lug on the hammer does not allow the gun to be fired unless it has been completely locked. **Dry firing:** To prevent dry firing when storing the gun or after you have removed the shells, push safety button into firing position, press locking lever upwards, pull the trigger and release the locking lever. **Do not attempt it when the gun is loaded. Cocking indicator:** Lets you know whether your gun is cocked. **Fore-end:** Positive locking by means of sunken-in latch plate mechanism (only found in expensive guns). **Barrel:** Chrome-lined barrel and chamber. **Stock:** Walnut finish hardwood. Hand checkered pistol grip stock with butt plate. **Sling swivels:** Are standard with every gun. There is not one ounce of plastic used in this gun (or any other Baikal shotgun).



IJ58MA & MAE CLASSIC SIDE BY SIDES
Receiver: Hot drop forged and machined from solid block of high tensile alloy steel, case hardened. **Parts** precisely machined. All case hardened and hard chrome plated, which you will not find in many guns, except the most expensive. Barrels are manufactured from high tensile steel, bore and chambers are chrome plated. **Locking mechanism:** Barrels are locked to the receiver by massive double under barrel locking lugs and a locking lever engaging the barrel nose hook. Locking is controlled by the locking lever.



IJ58MAE

IJ58MAE
Firing mechanism: Of a rebound hammer type. Coiled cylindrical case hardened main spring guarantees positive strike under any conditions. **Safety mechanism:** Automatic safety (sliding push button on top of receiver). Trigger mechanism is mounted on a separate base plate. Trigger pull 1.5 & 2.5 kg. Automatic safety simultaneously locks the trigger and sears, which makes the shotgun safe in handling. Soft and crisp trigger pull. **Uncocking,** unloading: Gun can be emptied and trigger mechanism uncocked by opening the breech, pushing the safety to the firing position, and at the same time, holding the trigger back. Then close the gun. **Hand checkered beavertail fore-end** in walnut (IJ58MAE) or walnut finish (IJ58MA) securely locked to the barrel by a sunken latch plate locking mechanism. **Hand checkered** stock is made of caucasian walnut (IJ58MAE) or walnut finished hardwood (birch or beech), and has a 1" ventilated recoil pad. Sling swivels are a standard feature. **Ejector system:** IJ58MAE features fully automatic ejectors that can be converted to standard extractors by a simple lever device located in the fore-end. IJ58MA has standard extractors.

IJ27EVR & IJ27EIC TRADITIONAL OVER & UNDERS
Hot drop forged receivers, chrome lined barrels, hard chromed interior parts, firing and safety mechanism are made with the same precision and attention to detail as found in the side by sides. **Safety device:** The IJ27 series features an additional safety device (hammer interceptors) that makes accidental discharge impossible. **Automatic extractor-ejector system:** The automatic ejector can be changed to extractor by turning the slots of the selector pin located on the pivot pin, along the shotgun axis. **Uncocking the gun:** Uncocking the gun for safe storage is easily done by pushing the safety button to the firing position, pulling both triggers and gently closing the barrel. The barrels are locked to the action by means of a hinge bolt and a massive locking lug engaging the barrel breech sleeve hook. Locking is controlled by the locking lever. **Ventilated rib:** The IJ27 series features a ventilated, matted rib 7mm wide. The stock and semi-beavertail fore-end are finely crafted and hand checkered from selected caucasian walnut. A one inch ventilated recoil pad adds to the value of the gun. **IJ27EIC:** Has all the features of the IJ27EVR, except comes with single selective trigger. To select the full choke (upper barrel), push trigger forward until you hear a click. Opening of the locking lever restores the initial sequence: the under barrel (modified choke) first, the over barrel (full choke) second.

TOZ17

TOZ8M-01 cal. .22 L.R. Single Shot Heavy Barrel Target:
The TOZ8M-01 is a perfect and inexpensive rifle for elementary training of junior sportsmen. Because of its reliability and accuracy, it is widely used by Russian trappers to hunt fur-bearing animals. The 8M-01 features a no taper 635mm (25") bull barrel with the same open sights as the TOZ17. The receiver is grooved for scope mounts. A loading ramp lets you load the bullet fast and clean, prevents scarring of the lead. The two stage non-adjustable trigger is smooth and crisp. Trigger pull is set between 0.8 kg (1¾ lbs) - 2 kg (4½ lbs). The beechwood walnut stained stock has target stock dimensions, and comes with pistol grip checkering, 39mm (1½") sling swivels and butt plate.
TOZ16-01 cal. .22 L.R. Single Shot: Comes with the loading ramp (TOZ8M-01). Otherwise has all the dimensions and features of the TOZ17-01.
TOZ17-01: The TOZ17-01 is still one of the best made low cost bolt action .22 L.R. rifles on the market today. The excellent accuracy of this 5-shot repeater comes from its tapered free floating barrel and its 4 grooved rifle bore. A solid steel bolt houses the firing mechanism and two machined extractors guarantee trouble free loading and extraction of the shells. The two stage trigger is non-adjustable. Trigger pull is between 0.8 - 2 kg. A thumb safety blocks the trigger pull. The TOZ17-01 features curved slide open rear sight with 25 meter increments and hooded front sight. The receiver is grooved for scope mounting. Walnut stained beechwood stock has checkered pistol grip and butt plate. 1" sling swivels and one spare 5-shot clip are standard equipment. The TOZ17 is an excellent rifle for plinking, target practice and hunting.

TOZ14-01 cal. .22 L.R. 5-shot Target Rifle:
Designed for the serious target shooter. The TOZ14-01 has all the features of the TOZ8M-01, and in addition comes equipped with an all steel fully adjustable micrometer peep sight with 3.17mm (⅛") click adjustment. (3 extra peep sights included). The tunnelled front sight accommodates interchangeable inserts. It is adjustable for windage. 1 spare clip magazine, 4 peep rear sights and 4 front sights, cleaning rod, brush and a screwdriver are supplied with every rifle. The TOZ8M-01 and TOZ14-01 are precision target rifles of outstanding value. You will not find another target rifle of this quality for the same price.

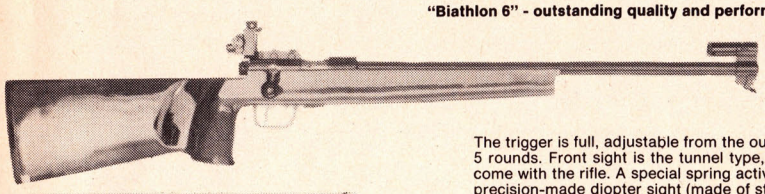
RUKO VOSTOK

. . . at ordinary prices" . . .

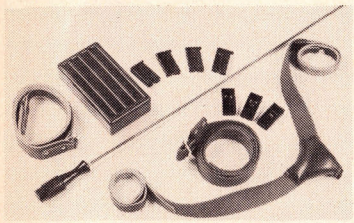
. . . with the same quality features for the same price.

The phenomenal achievements of Soviet marksmen are known around the world; to list them all would fill a book. There is no doubt that a prerequisite for such outstanding and continuous success is the talent, training and discipline of the individual shooter.
However, the best of them could not be successful if their gun could not deliver. It takes two to tango. The marksman and his gun. If one fails, both fail. And that is where the outstanding performance of a third party comes in.
The master craftsman of Tula, who makes sure that his creation will perform for the best in the world, against the best in the world. Trained in the old tradition of Tula gunsmithing, he can call on an immense wealth of experience and knowledge, gathered over 3 centuries and passed on from generation to generation. Up to date technologically advanced equipment give him the tools to produce a weapon that will comply to the most exacting specifications and details of the champion marksman.
Together, they have produced target weapons that are simply the best in the world. MCM, TOZ35 and MC55-1 are living testimonial and proof of this claim.
If you are a marksman who competes in free rifle and free pistol disciplines, you owe it to yourself to use a Vostok. It will ultimately make the difference between watching somebody else on the victor's podium, or standing there yourself. The decision is yours.

"Biathlon 6" - outstanding quality and performance at a price you can afford.



Interest in the "Biathlon" in Canada is growing fast. We are proud to offer the "Biathlon 6" made by the famous gunsmiths of Tula. The B1-6 features a 23⅝" free floating semi-bull barrel with a Mauser type bolt action that features 3 locking lugs forward of the bolt handle. Double extractors guarantee flawless extraction of shells.
The trigger is full, adjustable from the outside for pull 490 gr. (0.5 kg) to 990 gr (1 kg) and trigger travel 1-4 mm. The clip magazine holds 5 rounds. Front sight is the tunnel type, slotted and with a screw attachment to use any one of the 5 post or circular front sights that come with the rifle. A special spring activated cover protects the muzzle of the barrel and the sight tunnel from snow. The rear sight is a precision-made diopter sight (made of steel) consisting of a sight base and two movable slides with micrometer adjustment for windage and elevation. 4 diopters are supplied. The caucasian beech stock is hand checkered and has a walnut finish. The gun is supplied with a carrying case, shoulder strap, rifle sling, 4 extra magazines, 3 target holders, complete set of cleaning kit tools and oil can.



Vostok TOZ35 .22 cal. Free Pistol:
Beginning at the Cairo World Championships in 1962, the TOZ35 has been used to set numerous world and state records.
It is a perfectly balanced, international free-style single shot pistol.
The TOZ35 features a strong bolt-type action fixed to a precision 1¾" barrel.
The unique trigger mechanism can be changed in the slot to accommodate the length of the shooter's trigger finger. It is also a hair-type trigger, adjustable in pull from 10 to 100 grams.
The TOZ35's unique custom walnut grips are orthopedically designed and are fully adjustable for any hand size.
The TOZ35 also features changeable front and rear sights, of which the rear is fully adjustable for windage and elevation.
Each TOZ35 is fitted for its own wooden carrying case, with spare parts and cleaning accessories included.

VOSTOK TOZ35

MC55 FREE PISTOL .22 cal. - Built to set world records
The MC55 free pistol is one of the latest designs that has come on the market. Produced in limited quantities only, it is the most precisely built weapon yet that has come from the Vostok armouries, and is most likely the finest free-style single shot pistol available today.
The pistol is an outstanding example of craftsmanship. The barrel is made with great precision, has a length of 280mm and delivers excellent accuracy of fire.
The trigger mechanism is of the hair trigger type, fully adjustable from 10 - 100 gr. Also adjustable for creep. The angle of the trigger leaf is infinitely adjustable. A unique swinging bolt system locks the chamber and a safety device prevents firing unless the barrel is in a locked position.
Sights: Rear and front sights are exchangeable. The MC55-1 is supplied with 2 extra front and 2 extra rear sights. The rear sight has micrometer adjustment. Sighting radius is adjustable between 350-400mm.
Contured orthopedic walnut grip with palm rest assures you of a comfortable fit, and lets the pistol become a natural extension of your arm. Soviet marksmen have competed very successfully with the MC55 in recent years.
As a final touch, each MC55 comes in its own wooden carrying case with tools, critical spare parts and cleaning materials each in their own separate compartments.

30 YEARS SUPPLIER TO THE CANADIAN SPORTSMAN PRESENTS:

Fun

RUKO AIR

AIR RIFLES, TARGETS - ACCESSORIES - a total - Plinking, Hunting, Silhouette, Target, Match

Air rifle shooting: One of the least expensive

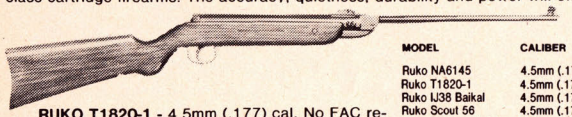
More and more shooters, not just kids, are rediscovering the fun and joy of air rifle shooting. Air rifle shooting is a sport for all ages. It offers as much challenge to the most accomplished Marksman as it does to the beginner.

It is very inexpensive. You can fire thousands of rounds a year and the cost of ammo will not break you. It can be done in your own home, in your basement, or in your garage. Safe places to shoot out of doors are easy to find.

European air guns are built with the same precision and excellence that is standard with high class cartridge firearms. The accuracy, quietness, durability and power will offer you a pleasant surprise. Many air guns are now considered by experts to be the world's most accurate guns, bar none. Today's Match air rifles and pistols have the accuracy to shoot one hole groups at 10 meters (33 feet). They offer an excellent way of training. Low discharge noise and the low or complete lack of recoil makes extensive airgun shooting more pleasant and flinch-free.

Air rifle shooting is on the up and coming, and was an added event at the 1984 Olympic Games in Los Angeles.

Whether you choose plinking, target or silhouette, air rifle shooting can give you hours upon hours of fun. Why don't you start today!



RUKO T1820-1 - 4.5mm (.177) cal. No FAC required.

RUKO SCOUT 56 - 4.5mm (.177) cal. Specially made for the young Marksman, grooved receiver with automatic double safety feature. No FAC required.

RUKO CADET #110 - Has same specifications as Ruko Scout.

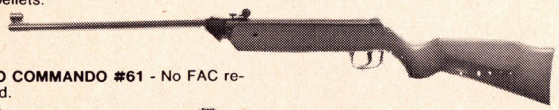
RUKO EXPOMATIC 107 - 25 shot repeater 4.5mm (.177) cal. High gloss walnut finished beechwood stock with cheek rest and pistol grip. No FAC required.

RUKO-EXPO #103 -Same as Expomatic, but single shot only.

RUKO GAMATIC 106 - 25 shot repeater (tube magazine). 4.5mm (.177) cal. with strong aluminum frame, expanded polymer stock and fore-end, rubber recoil pad, automatic safety. No FAC required.

RUKO GAMO 85 - Same air rifle as Gamatic but single shot only.

RUKO GAMATIC GIFT SET - Same as above with extra pellet trap, targets and pellets.



RUKO COMMANDO #61 - No FAC required.

IJ38: A lightweight pellet rifle featuring a hooded front sight and solid steel ramp open rear sight. Grooved receiver for scope mounting. High gloss hardwood stock with pistol grip cap and butt plate. Smooth trigger pull and easy handling make it the perfect gun for the youngster.

RUKO-SCOUT Model 56: A lightweight, smooth cocking cal. 4.5mm (.177) Air Rifle. Special features include hooded front sight, micrometer rear sight adjustable for windage and elevation. The rifle is grooved for scope mounts. Special automatic double safety device blocks trigger pull and prevents accidental closing when barrel is in cocked position. A beautifully styled beechwood stock is lacquer finished.

RUKO-EL GAMO AIR RIFLES - MADE IN SPAIN FOR RUKO OF CANADA LIMITED

RUKO EL GAMO - quality, dependability and economy by one of Spain's leading manufacturers of air guns. It comes in a variety of air rifle and air pistol models. Regardless of what model you will choose, you will get your money's worth and more.

To start out with, El Gamo is the only manufacturer who produces 25 shot air rifle repeaters (not to confuse this with BB's). There is a world of difference between shooting with a precision spring loaded air rifle or a B.B. gun.

The advantages of the repeater are obvious. You do not have to load after every shot you fire. You just cock the barrel and the next pellet slips out of the tube into the chamber. It's as simple as that. And the accuracy is as precise as with the single shots because the loading mechanism does not interfere with the air power supply.

All El Gamo air rifles and pistols feature smooth and crisp adjustable trigger pull, 850gr. (1.86 lbs) - 2400gr. (5.26 lbs). They also feature hooded front sights & micrometer rear sights (click adjustments for windage and elevation). Receivers on all rifles and pistols are grooved for telescopic sights.

All models except one have a special automatically activated safety feature that prevents accidental closing of the barrels.

Ruko El Gamo - a technically well designed, beautifully crafted line of air guns, reflecting the pride and craftsmanship of Spanish gun makers.

RUKO MAGNUM #127, 128: Single shot. Single stroke cocking action gives you 715ft/sec velocity. The lowest priced Magnum air rifle on the world market. Features beautiful beechwood Monte Carlo stock with cheek rest, white spacers on pistol grip, and butt plate, plus rubber recoil pad. Solid metal micrometer rear sights and automatic lever type safety that blocks trigger and prevents accidental closing of barrel are added features. Adjustable trigger pull and sling swivels. F.A.C. required.

RUKO MAGNUM MODEL 80: features special ramp for scope mounting, tunnelled front sight with 4 exchangeable inserts, rear sight with 4 notch rotating visor plate, automatic safety button.

RUKO COMMANDO MODEL 61C: Single shot features hooded ramp sight, micrometer rear sight adjustable for windage-elevation, grooved receiver for easy scope mounting. No FAC required.

FALCON #121: Presents the best value in air pistols on the market today. Single stroke under barrel cocking lever gives you 120mps (400ft/sec) velocity. Safety button comes on automatically when pistol is cocked. The Falcon comes nicely gift boxed.

CENTER #120: Compare features and price of the Center to any other air pistol on the market, and you will find no equal. Solid aluminum frame, polymer grip (thumb rest) that has a 4 position adjustment to give you the most comfortable and perfect grip. Supplied in a nice gift box, the Center comes complete with targets, 1 box of 250 pellets, gun oil, cleaning rod and brush. Excellent for target practice.

RUKO-DIANA AIR RIFLES - MADE IN WEST GERMANY FOR RUKO OF CANADA LIMITED

Ruko Diana, the trusted name in air rifles for nearly a century, has returned to the world market.

After World War II, Diana products were sold under various trade names: Gecado and Condor to name a few. Now, nearly 40 years later, Dianawerk Mayer & Grammelspacher can use their world renowned trade name "Diana" again.

The first product to appear under the old respected name is the Model 34, 24 and 26, the Diana Hunter Series. Incorporating the latest in air rifle technology, the Diana Model 34 Hunter is a compact construction of energy and power. At an incredible velocity of 280 meters/sec (915 ft/sec), the Diana Hunter 4.5mm (.177) pellet rifle is without peers in the market place.

The Diana Hunter Series features a new perfected safety system, which is activated as soon as you start cocking the barrels. The trigger is blocked automatically and the gun will fire only when the safety lever is pushed forward to the firing position. This feature prevents accidental closing of the barrel, which is often the cause of damage to air guns that do not feature this system.

Sights: The Diana Hunter Series features a solid steel hooded front sight and micrometer rear sight with click adjustment for windage and elevation. A special feature of the rear sight is the rotating visor plate (1 of 4 different sized notches in the visor plate can be selected easily by pushing a small spring loaded button).

A riflescope may also be used. Every receiver of every Ruko Diana air rifle is grooved for scope mounting.

Ruko Diana, air rifles of superior quality, all at very competitive prices.

Ruko-Diana Model 48 & 52

Here is a new super-highpower air rifle that gives you an incredible velocity of 320 m/s (976 f/s) with one pump with the side lever. The premium rifled fixed barrel, adjustable rear sight (windage & elevation) and solid roof front sight make it a perfect air rifle for long range precision and varmint shooting. The receiver features a scope rail for easy scope mounting. Model 52 is the Deluxe version of model 48.

RUKO-DIANA NEW DELUXE HIGH VELOCITY AIR RIFLES WITH "NEW" "MATCH-TYPE" TWO-STAGE ADJUSTABLE TRIGGER

Model 36 & 38 both feature the new Match-type trigger that gives target gun smoothness to these high velocity air rifles. Other features are the all-steel tunnel front sight with exchangeable inserts, all metal micrometer rear sight adjustable for windage and elevation with 4 notch rotating visor plate. A scope rail is mounted on the model 38 receiver. Beautiful walnut-finished beechwood stocks have checkered pistol grip, cheekrest and recoil pad. White spacers on pistol grip and recoil pad add beauty to the gun.

Model 45, power & precision - an air rifle for optimum accuracy: two-stage adjustable trigger, steel tunnel foresight with interchangeable inserts (additional inserts available), all steel rear sight, click micrometer for windage and elevation. Visor plate for rear sight with 4 notches, automatic safety button.

45	.177 (4.5)	260mps 855ft/sec	Yes	520	20½	485	19.1	1160	45⅝	3.5	7¾	AB	$299.50
45	.22 (5.5)	205mps 672ft/sec	Yes	520	20½	485	19.1	1160	45⅝	3.5	7¾	AB	$299.50

Special features: parkerized barrel sleeve, all metal tunnel front sight with 5 exchangeable ring foresights and 5 blade foresights (eagle's eye insert available on request). Ring foresights 2.0-5.0mm, each 0.02mm variance. Blade sights 1.8-3.4mm, each 0.02mm variance. All metal target micrometer rear peep sight (special precision micrometer peepsight Model 82 available). Match trigger adjustable for weight and creep. Adjustable trigger tongue. Oil polished walnut stock with Monte Carlo comb and cheek rest. Side lever cocking mechanism built on the time tested double piston construction. Completely recoilless and free of all vibration. Adjustable recoil pad, rail for target sling, spacer plates to adjust lengths of stock.

75	.177 (4.5)	175mps	480	19	720-830	28-32¾	1100	43⅜	5	11.3	A	$850.00

75HV: Same as above, but with adjustable cheek rest, 12mm ramp (detachable) & front sight elevation (detachable). Sugg. Retail $750.00.

LP5G: A single spring powered air pistol for plinking, target practice and small pest control. Light recoil. The LP5G features tunnel front sights and micrometer rear sight with the unique rotating visor plate insert (choose from 4 different size notches). Rear sight has micrometer click windage and elevation adjustment. A double trigger pull is adjustable for creep and pull. Automatic safety lever in front of trigger blocks accidental barrel closing. The air pistol can only be fired when barrel is closed and lever is pushed to firing position. An anatomically contoured grip incorporates thumb rest and palm swell and lets you aim the LP5G very comfortably.
The LP5G is also available in a scoped version, with 1.5X15 scope and muzzle brake.

LP6M: A single stroke barrel cocking mechanism with a 180° around barrel jacket that protects both hand and foresight during cocking. The complete elimination of recoil and vibration through the use of Diana's patented double spring system makes the LP6M an excellent gun for competition shooting. The very smooth functioning double pull trigger can be adjusted for creep and pull (creep can be completely eliminated). Free standing foresight features continuous adjustment from 2-4mm. The micrometer rear sight comes with the rotating visor plate insert.

Sooner or later the serious shooter will turn to the recoilless vibration free Diana air guns and air pistols. They deliver the ultimate in accuracy and enjoyment.

DIANA CONDOR AIR PISTOLS - RECOILLESS FOR COMPLETE VIBRATION FREE TARGET AND COMPETITION SHOOTING:
(Ask for special brochure)
LP10 Match: Special features include recoilless 2 air power piston system, automatic safety, superior match trigger with following adjustments: trigger spacing 5mm finger rest from large to small contact surface, pretravel length 1-6mm, pretravel pull 140-200gr., trigger pull 250-800gr. Sights: blade front sight adjustable from 2-4mm, micrometer rear sight for windage and elevation. Position of the rear sight can be altered, adjusting length between sights to 315mm (12⅜"), 335mm (13 - 3/16") or 355mm (14"). Grip: Wooden pistol grip with adjustable hand rest (height and length). LP10 is an excellent pistol for competition shooting.

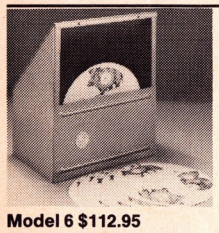
Mod. 48/52

RUKO-Diana Model 48 Standard/52 Deluxe. "Super Power" Super power with one pump of the side lever, F.A.C. required. With a muzzle velocity of 320 meter/second (1050 fps) this is one of the most powerful .177 cal. Air Rifles ever made. Fixed precision grooved barrel, fixed front sight, fully adjustable micrometer rear sight (with rotating 4 notch right insert) and smooth crisp trigger pull make it an excellent rifle for Varmint and pest control. A scope of your choice can be mounted on the receiver rail and will help you to increase your marksman proficiency. (See RUKO-HAKKO Air Rifle scopes.) The safety button, blocking the trigger goes on automatically when cocking the Air Rifle. Very important: Never dry fire this or any other Air gun. Overall length: 110 cm (43.3"), barrel length: 44 cm (17.3"), weight: 4 kg (8.88 lbs).

Sugg. Retail: $395.00 $450.00



Model 6 $112.95

Model 5 $139.95

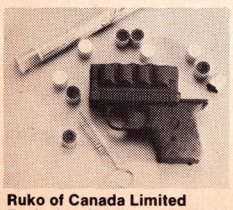
Model 7: $59.95
recommended for air pistols and air rifles.

Ruko Air Rifle Shooting Galleries could add hours of fun and enjoyment during those dreary days or evenings when the weather is too nasty, and if the sun shines, air rifle shooting is also good fun in the outdoors. Air rifle shooting is a great and inexpensive way to sharpen your target skills. We have added 4 new pellet traps to our lineup, 2 with stationary targets and 2 with moving targets.

Model 6 Ruko Pellet Trap: rotating target with 3 different animal pictures. The turning target is operated by a small electric motor powered by 2 size C batteries. A threaded knob holds the target to the turning axle. Model 6 Ruko pellet trap is supplied with 5 extra targets and 2 batteries. A target holder for targets size 10 x 10cm (4" x 4") is hinged to the trap and can be used for stationary target practice (see picture Model #5).
Size: Height 235mm (9 1/2") Width 200mm (7 7/8") Depth 135mm (5 3/16") Weight 2 kg (4 1/4 lb)

Model 5 "Duck Gallery" has the duck move from right to left across the "shooting" window. The mechanics are the same as in Model 6. The duck silhouettes tip over when hit. The target shown in the middle of the trap is hinged and is simply pivoted on top of the trap when you go for the ducks. The duck silhouettes are of a tough plastic material and will last a long time. Recommended for air rifles and air pistols.
Size: Height 235mm (9 1/2") Width 400mm (15 3/4") Depth 135mm (5 3/16") Weight 3 1/4 kg (7 lb)

Model 7, A Unique new pellet trap that can be used for pellet and dart shooting: This pellet trap is made of a heavy gauge steel covered with a tough layer of epoxy. A unique clamping system, 4 round steel bars, holds all popular targets from size 10 x 10mm (2.5" x 2.5") to 170 x 170mm (6.7" x 6.7"). Turn the trap to its back and you will find a board (wood-felt combination) which can be used when shooting with air rifle darts.
Size: Height 240mm (9 1/2") Width 210mm (8 1/4") Depth 215mm (8 1/2") Weight 3 kg (6.6 lbs)



Model 64 blued: $59.95
Model # FL 15

tube with 10 pieces 15 mm flares: 6.95

Available in white, red, green, yellow

Ruko-Starter Signal and Flare Pistols. Used in sporting events, training of dogs and other purposes. They are a necessary survival tool when you venture deep into the unknown Wilderness. Flawless performance and reliability will be most appreciated when you are in a "tight spot", when firing a flare could make the difference of being lost or found. All guns shown on this page are made by a well known German Arms Manufacturer. Quality and reliability of the guns easily warrants the price. Recommended for 18 years or over.

RUKO — "STAKKATO" Signal battery. 8 shot semi automatic repeater to shoot 15 mm Signal or Crack Cartridges. Standard 6 mm blanks are used for igniting and propelling flares and Crack Cartridges. The STAKKATO is a very reliable signal instrument and recommended for situations where rapid firing of signals is vital.
Overall length: 130mm (5.1"), height: 100mm (4"), weight: 530gr (1.18 lbs) Sugg. Retail:

Exclusive distributor for El Gamo, Diana & Norica air rifles

Krico

Manufacturers of Hunting & Match rifles for over 100 years.

The unrelenting pursuit of perfection is evident in every rifle in the Krico line. For decades they have slowly refined their manufacturing techniques to produce the ideal hunting, target, or match rifles in terms of accuracy, workmanship, reliability and safety. Presented here is the direct result of their dedicated efforts, beautiful rifles that will please even the most discriminating sportsman. Each centerfire rifle features Krico's famous timepiece precision action design with double locking lugs, fast ignition time, quiet short throw machine jewelled bolt and the distinct advantage of total bolt disassembly without the use of tools. Krico barrels are also manufactured in this same precise manner. Each barrel is cut while submerged in an oil bath to avoid any possible stress factors which might effect the total accuracy of the barrel. Add to this, exceptional deep lustre blueing, a select French walnut stock, fine line hand checkering, quality sights, sling swivels and the option of unlimited customizing to suit the desires of any serious shooter or collector, and you have a rifle line of unparalleled quality at affordable prices.

640S "Super Sniper" for calibers Group I
Ask for special brochure
Scope not included.

640S "Super Sniper" is being used by law enforcement agents and sharpshooters in Europe, Canada and the U.S.A. The Super Sniper is loaded with an abundance of special features. The sandblasted for anti-glare specially designed bull barrel made for high precision shooting features a muzzle brake-flash finder that keeps the aim right on target. The ¾" knob on the bolt lets you use heavy gloves to work it in cold weather. A match trigger mechanism, fully adjustable for creep and pull, is fitted with a 10mm wide trigger shoe that gives you a sure and positive feeling when you squeeze off a round. The safety works very **Quietly** and smoothly. A 3-shot clip magazine makes for fast reloading. The specially designed sniper stock, made from select walnut, oiled and polished, features a ventilated fore-end for fast cooling, quick adjustable comb for perfect alignment of your eye level to the level of the scope, a butt plate vertically and horizontally adjustable for perfect shoulder fit. The Ruko-Krico "Super Sniper" is a superb masterpiece of German craftsmanship.

640S Silhouette & Competition Repeater for calibers Group II

630S Competition Single shot for calibers Group I

640S/740S Silhouette is designed for Silhouette competitions. Has nearly all the features of the 640S Sniper model. The serious competitor will appreciate its pinpoint accuracy.

600/700 Hunting Rifle for calibers Group III & IV

600D/700D Hunting Rifle Deluxe for calibers Group III & IV

600/700 Series Hunting rifles with the classic European "Schnabel" stock made of select European Walnut features crisp 16 lines per inch hand checkering on pistol grip and fore-end. Pistol grip cap, sling swivels and recoil pad are additional features. High gloss blued barrels are forged from extra tough chrome-molybdenum steel. The rear sight is adjustable for windage, the unique front sight for elevation. Receiver is tapped and drilled for scope mounting. Fully adjustable set trigger mechanism is very crisp and smooth. The jewelled precision-crafted bolt can be field stripped without any tools. The extra long easy to reach safety button operates silently and smoothly. A 3-shot quick detachable clip magazine makes for fast reloading. Well balanced, fast pointing, the Krico 600/700 Hunting Rifles will bring you outstanding performance and great pleasure for years to come.

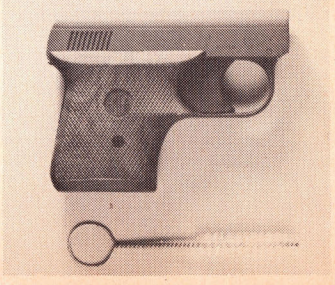
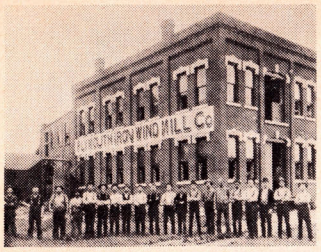
Model 63 nickel: $54.95





AT DAISY, WE'RE BEGINNING

1986 is Daisy's 100th anniversary. A century ago this year, we pioneered the American airgun. And we've been responsible in the airgun industry since then.

Here, in an abbreviated form, is a look at Daisy's first 100 years.

And, 100 years of firsts.

1886: FROM WINDMILLS TO AIRGUNS.

In an attempt to revitalize sales, the Plymouth Iron Windmill Company of Plymouth, Michigan decided to manufacture local citizen Clarence Hamilton's airgun invention and give it away as a premium. Windmill sales failed to improve, but the airgun was an instant hit and an American tradition was born. The firm stopped making windmills and was officially renamed Daisy Manufacturing Company in 1889.

1900: THE FIRST REPEATER AIR RIFLE.

A major advancement over the singleshot models of the day, the first BB repeater confirmed Daisy's leadership position in the airgun industry, a position the company has never relinquished.

MODEL 105 PAL™

The perfect starter gun for the beginner. The first in our line of controlled velocity airguns. It is designed to balance more comfortably in the hands of youngsters 8 to 10 years old. It's ideal for teaching responsibility, marksmanship and proper gun handling techniques to the future marksman.

sugg. retail $28.95

PRODUCT FEATURES

- 400-shot B•B repeater; positive magnetic feed.
- Sized for beginning shooters.
- Lever action.
- Blade and ramp front sight; open fixed rear sight.
- Sheet steel receiver; molded stock, woodgrained.
- Manual crossbolt trigger block safety.

CRITICAL SPECIFICATIONS

- Muzzle velocity up to 275 fps (84 mps).
- Ideal for teaching gun safety.
- Shoots B•B caliber ammo.
- Recommended for ages 8-10 with adult supervision.

FAC Not Required

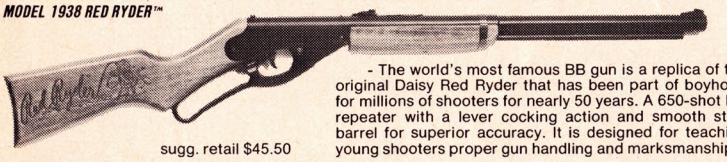
- Barrel: Smooth bore steel; shrouded - 19 in. long.

MODEL 1938 RED RYDER™



- The world's most famous BB gun is a replica of the original Daisy Red Ryder that has been part of boyhood for millions of shooters for nearly 50 years. A 650-shot BB repeater with a lever cocking action and smooth steel barrel for superior accuracy. It is designed for teaching young shooters proper gun handling and marksmanship.

sugg. retail $45.50

- 650-shot B•B repeater; positive magnetic feed.
- Lever Action.
- Blade and ramp front sight; open rear sight with elevator adjustment.
- Sheet steel receiver with saddle ring and leather thong.

- Muzzle velocity up to 280 fps (85 mps).
- Stained hardwood stock with Red Ryder™ logo; matching hardwood forearm.
- Shoots B•B caliber ammo.
- Recommended for ages 10 years or older with adult supervision.

FAC Not Required

- Action: Spring air.
- Caliber: B•B cal. (4.5 mm) steel airgun shot.
- Maximum shooting distance: 195 yds. (179 m).
- Weight: 2.2 lbs.
- Overall length: 35.4 in.
- Barrel: Smooth bore steel; shrouded.

CENTENNIAL MODEL 25

The Daisy Model 25 Centennial Collector's Edition is a replica of one of the first pump guns designed in 1911 by Charles F. LeFever. Featuring a 46-shot BB capacity, blued receiver, lever with case hardened finish, walnut forearm and stock, this limited edition air rifle has an official bronze medallion embedded into the left side of the stock.

sugg. retail $134.50

- 46-shot B•B repeater.
- Blade front sight, open rear sight.
- Sheet steel barrel with removable smooth bore shot tube.
- Blued receiver, case hardened finish lever.
- American black walnut stock and forearm.

- Muzzle velocity up to 340 fps.
- Authentic styling.
- Shoots B•B caliber ammo.

FAC Not Required

- Action: Spring air, pump action.
- Caliber: B•B cal. (4.5 mm) steel airgun shot.
- Maximum shooting distance: 217 yds. (198m).
- Weight: 3.25 lbs.
- Overall length: 37.5 in.
- Barrel: Smooth bore steel.

MODEL 188™

- The Number One air pistol for the young shooter. Rugged all-metal construction, sleek contemporary styling with performance to match. Daisy engineers designed the 188 B.B. especially for young shooters age 10 and up. For developing marksmanship, learning proper pistol handling techniques and just plain shooting fun, no other youth air pistol on the market can match the Daisy Model 188.

sugg. retail $32.95

- 24-shot B•B repeater.
- Single stroke cocking lever; under the barrel for quick action.
- Rugged metal construction; die cast zinc.
- Checkered grip with thumb rest.
- Blade and ramp front sight; open fixed rear.
- Manual crossbolt trigger block safety.

- Muzzle velocity up to 215 fps (66 mps).
- Controlled velocity for better accuracy.
- Shoots B•B caliber ammo.
- Recommended for ages 10 years or older with adult supervision.

FAC Not Required

- Action: Spring air.
- Caliber: B•B cal. (4.5 mm) steel airgun shot.
- Maximum shooting distance: 165 yds. (151 m).
- Weight: 1.7 lbs.
- Overall length: 11.7 in.
- Barrel: Smooth bore steel.

92

- A new 002 Semi-automatic pellet pistol sets a new standard in air gun development. The new Daisy 92 semi-auto represents the most dramatic innovation the air gun industry has seen in many years. It fires 10 rounds of pellets without cocking. The 92 is an exact replica of the 92F Beretta, the official sidearm of the United States Armed Forces. Velocity is 400 fps. Rifled steel barrel and adjustable rear sight give the model 92 pinpoint accuracy. No other pellet pistol on the market today can match the Power Line 92 in shooting speed and accuracy. Spectacular? We think so, and so will you when you see it.

sugg. retail $82.50

- CO_2 powered semiautomatic pistol.
- 10-pellet repeater, no cocking required.
- Removable magazine.
- Single or double hammer action.
- Adjustable rear sight.
- Rifled steel barrel.
- Hammer block safety.

- Average muzzle velocity of 400 fps (122 mps).
- Rifled steel barrel for greater accuracy.

FAC Not Required

- Action: CO_2 powered semiautomatic.
- Caliber: .177 cal. (4.5 mm) lead airgun pellets.
- Maximum shooting distance: 224 yds. (205 m).
- Weight: 2.15 lbs.
- Overall length: 8.5 in.
- Barrel: Rifled steel.

OUR SECOND CENTURY RIGHT

1913: THE FIRST PUMP ACTION AIR RIFLE.

In terms of accuracy and workmanship, the Daisy Model 25 Pump Gun marked a significant breakthrough in airgun engineering. In fact, the gun was so designed that it remained virtually unchanged for more than 60 years.

1928: THE FIRST STEEL BBs.

Discovering they could achieve higher velocities, many youngsters began shooting discarded steel ball bearings in place of standard lead shot. Often, they damaged their guns in the process. To ensure the uniform manufacture of steel BBs, Daisy decided in 1928 to enter the steel shot business.

1948: FIRST IN SHOOTING EDUCATION

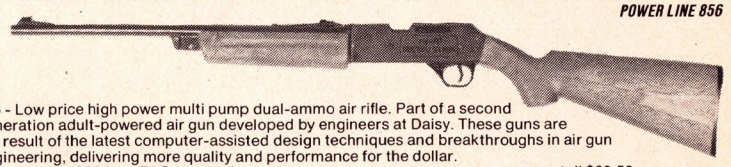
Deeply committed to the development of responsible youth activities, Daisy pioneered the nation's first shooting education program in 1948. Still an integral part of the Daisy corporate philosophy, these programs have introduced literally millions of youngsters to the sport of shooting.

Daisy® AN AMERICAN TRADITION CONTINUES 1886-1986

Daisy®
FIRST IN AIRGUNS.

POWER LINE 856

PRODUCT FEATURES	CRITICAL SPECIFICATIONS	GENERAL SPECIFICATIONS
• Easy loading, 100-shot B•B repeater or single shot pellet. • Ramp and blade front sight; open rear sight with elevator adjustment. • High impact molded receiver with dovetail mount for Daisy Point Sight™ or 4 power scope. • Molded, woodgrain stock and forearm with straight comb stock. Styled forearm bar, molded-in finger grooves for more stability and gripping power. • Manual crossbolt trigger block safety.	• Muzzle velocity up to 650 fps (198 mps) using B•Bs with only 10 easy pumps. • Designed to be low-end adult power airgun. • Positioned to sell head-on against the Crossman™ 750. • Shoots either pellets or B•Bs. • For shooters 16 years of age or older with adult supervision.	• Action: pneumatic pump-up (forearm pump lever). • Caliber: .177 (4.5 mm) lead airgun pellets;B•B cal.(4.5 mm) steel airgun shot. • Maximum shooting distance: 286 yds. (261 m) @ 10 pumps using B•Bs. • Weight: 2.75 lbs. • Overall length: 37.4 in. • Barrel: Rifled steel for greater pellet accuracy; shrouded.



856 - Low price high power multi pump dual-ammo air rifle. Part of a second generation adult-powered air gun developed by engineers at Daisy. These guns are the result of the latest computer-assisted design techniques and breakthroughs in air gun engineering, delivering more quality and performance for the dollar.

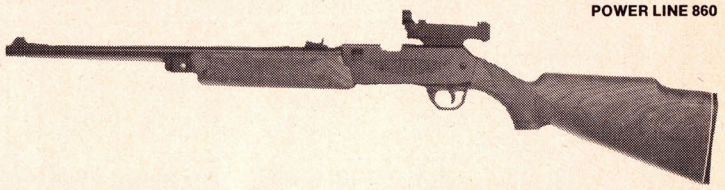
POWER LINE 860

- Easy loading, 100-shot B•B repeater or single-shot pellet; enlarged port for easy pellet loading.
- Ramp and blade front sight; open rear sight with elevation and windage adjustment.
- Heavy die cast metal receiver with dovetail mount for Daisy Point Sight™ or 4 power scope.
- Monte Carlo stock styling; molded woodgrain with white line spacer and butt plate; checkered grip area; forearm is molded with checkered pattern for sure grip.
- Manual crossbolt trigger block safety.
- Limited one year warranty.
- Model 2860 only; new Point Sight™ mounts on receiver dovetail. Reflects an image pattern on target. Packed with extra reticles for shooter preference. Adjustable for windage and elevation. Instructions included.

- High-power muzzle velocity. Up to 650 fps (198 mps) using B•Bs with only 10 easy pumps.
- Model 2860 includes Daisy's new, unique Point Sight™ system.
- Computer-assisted design; optimum pump force for maximum power.
- Super accuracy with rifled steel barrel; 0.8 in. center to center with pellets.
- Shoots either pellets or B•Bs.
- Superior styling; classic sporter style with pump lever incorporated into forearm.
- Full size and weight.
- Shooters 16 years of age or older with adult supervision.

- Action; pneumatic pump-up.
- Caliber; .177 cal. (4.5 mm) lead airgun pellet; B•B cal. (4.5 mm) steel airgun shot.
- Maximum shooting distance: 286 yards. (261 m) @ 10 pumps using B•Bs.
- Weight: 4.18 lbs.
- Overall length: 37.4 in.
- Barrel: Rifled steel for greater pellet accuracy; shrouded.

2860 w/point sight sugg. retail $95.00
2860V w/point sight & veloc. sugg. retail $99.50



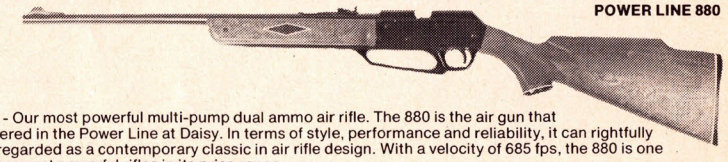
860 - Like the Power Line 856, Daisy engineers gave the dual ammo 860 the adult styling Power Line rifles are famous for, along with the kind of sizzling muzzle velocities experienced shooters are looking for. The 860 is precision balanced and weighted for greater shooting ease. It has a rifled steel barrel for pinpoint accuracy.
Model 2860 includes Daisy's unique Point Sight™
860 - velocity 650 fps - FAC required — sugg. retail $79.50
860V - velocity 495 fps - FAC not required — sugg. retail $82.95

POWER LINE 880

- Easy loading, 100-shot B•B repeater or single shot pellet.
- Ramp and blade front sight; open rear sight with elevation and windage adjustment.
- Heavy die cast metal receiver with dovetail mount for scope; die cast pump lever.
- Monte Carlo stock styling; molded woodgrain with white line spacer and butt plate; checkered grip area; beavertail forearm is molded with black/white diamond inset plus checkered.
- Manual crossbolt trigger block safety.

- High power! Muzzle velocity up to 685 fps (209 mps) with only 10 easy pumps.
- Quality engineering! Full size and weight.
- Dual ammo; shoots either .177 caliber pellets or B•Bs.
- Rifled steel barrel for greater accuracy.
- For shooters 16 years of age or older with adult supervision.

- Action: Pneumatic pump-up.
- Caliber: .177 cal. (4.5 mm) lead airgun pellets; B•B cal. (4.5 mm) steel airgun shot.
- Maximum shooting distance: 291 yds. (266 m) @ 10 pumps using B•Bs.
- Weight: 4.5 lbs.
- Overall length: 37.6 in.
- Barrel: Rifled steel; shrouded.



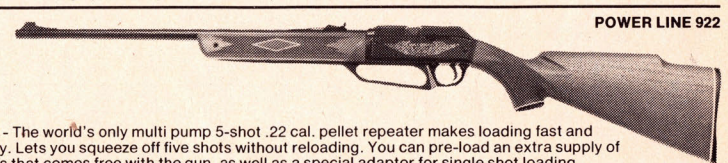
880 - Our most powerful multi-pump dual ammo air rifle. The 880 is the air gun that ushered in the Power Line at Daisy. In terms of style, performance and reliability, it can rightfully be regarded as a contemporary classic in air rifle design. With a velocity of 685 fps, the 880 is one of the most powerful rifles in its price range.
880 - velocity up to 685 fps - FAC required — sugg. retail $86.75
880V - velocity up to 495 fps - FAC not required. — sugg. retail $95.50

POWER LINE 922

- Heavy die cast metal receiver with engraving; dovetail scope mount for Daisy Point Sight™ or 4 power scope.
- Woodgrained Monte Carlo stock; molded with white line spacer and butt plate; checkered grip area; beavertail forearm is molded with diamond inlay; stain and wipe finish complements both parts.
- Ramp and blade front sight; open rear sight with elevation and windage adjustment.
- Manual crossbolt trigger block safety.

- The Arkansas Can Opener™! Hard hitting fun.
- High power! Muzzle velocity up to 530 fps (162 mps) with only 10 easy pumps.
- Snap-Shot™ clip; exclusive Daisy feature holds five .22 cal. pellets for easy loading; single shot adapter included.
- Super accuracy with rifled steel barrel.
- Full size and weight.
- For shooters 16 years of age or older with adult supervision.

- Action: Pneumatic pump-up.
- Caliber: .22 cal. (5.5 mm) lead airgun pellet.
- Maximum shooting distance: 333 yds. (304 m) @ 10 pumps.
- Weight: 4.5 lbs.
- Overall length: 37.6 in.
- Barrel: Rifled steel: shrouded.



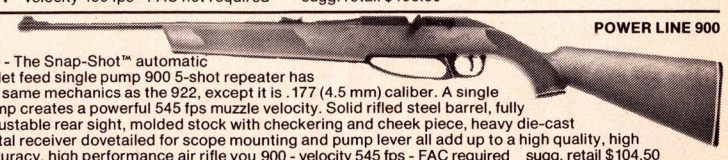
922 - The world's only multi pump 5-shot .22 cal. pellet repeater makes loading fast and easy. Lets you squeeze off five shots without reloading. You can pre-load an extra supply of clips that comes free with the gun, as well as a special adaptor for single shot loading.
922 - velocity 530 fps - FAC required — sugg. retail $97.50
922V - velocity 495 fps - FAC not required — sugg. retail $106.50

POWER LINE 900

- Easy loading 5-shot clip.
- Rear sight fully adjustable for elevation and windage.
- Full length molded stock with checkering, cheek piece, white spacers.
- Heavy die-cast metal receiver, dovetail mount for scope, rifled solid steel barrel, heavy die-cast pump lever.

- High-powered! Average muzzle velocity of 545 fps (166 mps) with single pump
- Full-size.
- Solid rifled steel barrel shoots pellets with greater accuracy.
- For shooters 16 years of age or older with adult supervision.

- Action: Single-pump pneumatic.
- Caliber: .177 cal. (4.5 mm) lead airgun pellets.
- Maximum shooting distance: 264 yds. (242 m).
- Weight: 4.3 lbs.
- Overall length: 38-3/8 in.



900 - The Snap-Shot™ automatic pellet feed single pump 900 5-shot repeater has the same mechanics as the 922, except it is .177 (4.5 mm) caliber. A single pump creates a powerful 545 fps muzzle velocity. Solid rifled steel barrel, fully adjustable rear sight, molded stock with checkering and cheek piece, heavy die-cast metal receiver dovetailed for scope mounting and pump lever all add up to a high quality, high accuracy, high performance air rifle you will treasure for years to come.
900 - velocity 545 fps - FAC required — sugg. retail $104.50
900V - velocity 495 fps - FAC not required — sugg. retail $112.95

POWER LINE 1200

- 60-shot B•B magazine.
- Molded grips and foregrip; woodgrained and checkered.
- Open rear sight adjustable for windage and elevation; blade and ramp front sight.

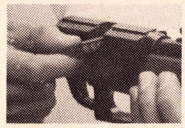
WHERE WE'VE ALWAYS BEEN.

1966: FIRST ANNUAL INTERNATIONAL BB GUN CHAMPIONSHIP. Co-sponsored by Daisy and the U.S. Jaycees, this event marked the beginning of the world's largest and most successful youth shooting competition.

1978: THE WORLD'S FIRST PELLET CLIP REPEATER. Daisy's Power Line® 922 introduced a unique five-shot clip that eliminated the inconvenience of loading pellets individually. Like many Daisy innovations before it, the design has been widely imitated by competitors.



1979: AMERICA'S FIRST OLYMPIC CLASS AIR PISTOL.

While better known for its popularly priced products, Daisy has been instrumental in developing some of this country's most sophisticated precision airguns. The Daisy Model 777, for instance, was the first (and still the only) American-made Olympic class air pistol.

For the Marksman — **Air rifle shooting: One of the least expensive and safest sports. Join the fastest growing sport in North America. Join your local club today.** — **for the Olympian**

POWER LINE™ 970 - 5-shot Multi-pump, recoilless

FAC Required

970V sugg. retail $132.50
970 sugg. retail $122.95

The Power Line® 970 set the standard for power, performance and economy. Featuring an easy loading, 5-shot clip, this recoilless pellet repeater represents the ultimate in shooting ease and handling. The clip indexes positively and,, for those shooters who prefer to load singly, a single shot adapter is provided. The Model 970's multi-pump pneumatic system is versatile enough to allow indoor shooting when a 2-to 5-pump level is used, or powerful enough to deliver up to 665 fps (203mps) with 10-pumps for outdoor plinking.

SPEC SUMMARY

Caliber: .177 cal./4.5mm
Weight: 5.2 lbs./2.4kg
Length: 37.5 in./95.3cm
Velocity: Up to 666 fps/ 203mps*
Maximum Pumping Force: 18.5 lbs./82.3N*
Maximum Range: 284 yds./259m at 10 pumps.
Firing Behavior: Recoilless, multi-pump pneumatic.
Barrel: 20.6 in./52.3cm; 12-groove button rifling; bore sized for precision pellets.
Sights: Blade and ramp front; open rear, adjustable for windage and elevation; 17.1 in./43.4cm sight radius.
Stock: Stained and finished hardwood; Monte Carlo styled for right- or left-handed shooters.
Forearm: Stained and finished hardwood to match stock.
Action: Pneumatic pump-up with straight pull bolt action.
Safety: Manually operated cross bolt trigger block with red indicator and open bolt for maximum safety.
Feed System: 5-shot clip accepts all popular pellet brands.
Trigger: Single stage, 5.0 lbf/22.2N pull.
Trigger Pull Length: 13.6 in./34.5cm

POWER LINE™ 953 - Precisioin target, recoilless

FAC Not Required

The Power Line® 953 represents Daisy's response to the need for a moderately priced, American-made, 10-meter precision pellet rifle. Designed and engineered for superior shooting accuracy and exceptional balance, no other pellet rifle made in the United States gives shooters more quality per dollar than the Model 953.

The competition sighting system of the Model 953 features a globe front sight, with four changeable aperture inserts mounted on the muzzle weight and a rear peep sight mounted on a standard 3/8" dovetail. The rear sight is micrometer click adjustable for elevation and windage. Yielding extremely consistent shot-to-shot velocities of 480 fps (146mps), the recoilless, single stroke pneumatic action makes the Model 953 smooth and easy to pump.

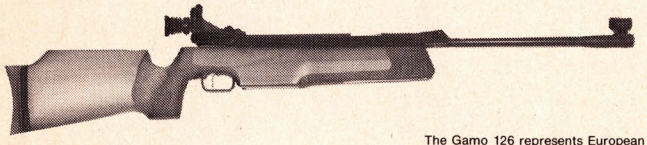
For added accuracy, the Model 953's precision, match quality barrel by world famous LOTHAR WALTHER™ is choked at the muzzle with special attention given to the counterbored crown. The stained and finished, full-sized hardwood stock comes up quickly and easily for either right- or left-handed shooters, and is equally suited to stationary targets or Running Boar shooting.

953 sugg. retail $229.95

Caliber: .177 cal./4.5mm
Weight: 5.08 lbs./2.3kg
Length: 38.9 in./98.8cm
Velocity: 480 fps/146mps
Pumping Force: 20.0 lbs./89.0N
Muzzle Energy: 4.0 ft.lbs./5.4J.
Maximum Range: 249 yds./228m.
Accuracy: 0.38 in./9.65mm max. c. to c.
Firing Behavior: Recoilless, single pump pneumatic
Feed System: Single shot; handles all popular pellet brands.
Trigger: Single stage; 4.5 lbf/20.0N pull.
Trigger Pull Length: 13.5 in./34.3cm.
Barrel: 20.9 in./53.1cm; 12-groove rifling; high-grade, solid steel by LOTHAR WALTHER™; precision crowned; bore sized for precision match pellets.
Sights: Globe front with four aperture inserts; precision micrometer adjustable rear peep sight mounted on a standard 3/8-in. receiver dovetail. 26 in. /66.04cm sight radius.
Stock: Full-length, select American hardwood; stained and finished; black butt plate with white spacers.
Action: Pneumatic single pump with straight pull bolt action.
Safety: Manually operated cross bolt tirgger block with red indicator and bolt open trigger block for maximum safety.

GAMO 126 - Olympic Match, recoilless

FAC Required



The Gamo 126 represents European airgun technology at its very finest. An exclusive air compression system assures constant air pressure and totally eliminates vibration and recoil. Featuring hooded front sight with changeable apertures, precision match rear sight, micrometer adjustable for windage and elevation, as well as a trigger that is fully adjustable through all stages, the Gamo 126's precision accuracy and outstanding performance made it one of the guns selected for use in the 1984 Olympic Games. This .177 caliber (4.5mm) single pump pneumatic air rifle delivers a powerful 590 fps (180mps) muzzle velocity.

Designed in Spain for superior balance and feel, the Gamo 126 has a one-piece, match style, hardwood stock with pistol grip and a precision rifled steel barrel by world famous LOTHAR WALTHER™. The generously proportioned hardwood stock with stippled grip section and foregrip lends itself to custom fit modifications and feautres a sling rail and vertically adjustable butt plate.

The reliable, consistent performance of the Gamo 126 has made it a natural choice of serious, competitive adult shooters worldwide.

POWER LINE™ 747 - International Match FAC Not Required

The .177 caliber (4.5mm) Power Line® 747 combines the precision of Daisy's Olympic class Model 777 with the economy of the Polwer Line® 717. Designed and engineered to meet the need for a less expensive, competitive air pistol, the Model 747 incorporates all the basic feautres required of a match quality pellet pistol.

A muzzle velocity of 360 fps (110mps) is delivered by the Model 747's recoilless, side lever, single pump pneumatic action with an adjustable piston for maintained accuracy. In the Daisy tradition of attention to quality, each Model 747 produced is individually machine-rest tested to insure conformance to accuracy standards. The wide face trigger is adjustable from 1.0 to 3.0 lbf (4.4 to 13.3N) and has a crisp, clean letoff. The match grade barrel, by world famous LOTHAR WALTHER™, is precision rifled, choked and painstakingly crowned at the muzzle. Match quality sights feature blade and ramp front, with a square notch rear sight that is adjustable for windage and elevation. Molded, woodgrained and checkered grips of high impact plastic with contoured thumb rest give the Model 747 the look and feel of match quality air pistols costing twice as much.

747 sugg. retail $134.95

Caliber: .177 cal./4.5mm
Trigger Pull: 1.0-3.0 lbf/ 4.4-13.3N (adjustable)

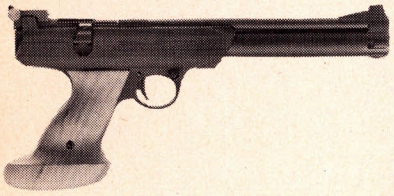
Accuracy: 0.40 in./10.2mm max. c. to c.
Pre-Sale Service: Each unit individually machine-rest tested to insure conformance to accuracy standards.

POWER LINE™ 777 - Olympic Class, recoilless

FAC Not Required



Originally designed as a limited edition air pistol for use in international championship shooting competitions, the Power Line® 777 represents one of today's most impressive offerings in the adult precision category.

The concept and engineering sophistication behind the Model 777 makes it America's only Olympic class precision air pistol, and for good reason. The single pump pneumatic action of the Model 777 virtually eliminates recoil and vibration while the side operating pump lever insures smooth action and easy pumping. The adjustable piston length affords optimum accuracy in competitive shooting situations. When we say "optimum accuracy," we say it with confidence because each Model 777 produced is individually machine-rest tested to insure conformance to the most stringent accuracy standards. The Model 777's precision sight system features a wide blade and ramp front and fully adjustable micrometer rear, with an adjustable rear notch width. The single stage trigger has a wide face with clean, crisp letoff and is adjustable from 1.0 to 3.0 lbf (4.4 to 13.3N) via a screw in the front grip strap. The match grade LOTHAR WALTHER™ solid steel barrel with 12-groove rifling, counterbored muzzle and precision crown, combined with contoured solid walnut grips, provide the Model 777 with balance comparable to prestigious European air pistols. The Power Line® 777 conforms to all NRA/ISU standards.

777 sugg. retail $257.95

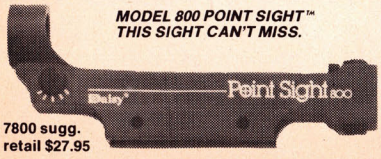
Muzzle energy: 2.2 ft.lbs./3.0J.
Maximum Range: 209 yds./191m.
Accuracy: 0.20 in./5.1mm max. c. to c.
Instruction: Daisy Operation Manual.
Pre-Sale Service: Each unit individually machine-rest tested to insure conformance to accuracy standards.
Accessories (included): Adjusting tool; tube of Daisy gun oil; Daisy Operation Manual; patches and cleaning rod; box of Daisy No. 555 International Match Pellets; pad of 10-meter targets. Gun and accessories are packed in a foam-lined carton with carrying handle.

MODEL 800 POINT SIGHT™ THIS SIGHT CAN'T MISS.



7800 sugg. retail $27.95

Point Sight is a revolutionary new concept in sights that can't miss. Because it improves both accuracy and speed of shooters at all skill levels. From beginners to match shooters.

Point Sight is a unique new sighting system that reflects a dot onto a lens and back to the shooter's eye. The sight picture that's created is one dot — right on target. There's no aperture to focus into. No blade and rear sight to align. Just put the dot on the target and shoot. It's that simple.

Point Sight is lightweight carbon graphite composite, comes with a limited one year warranty, and fits any rifle with standard 3/8" dovetail mount or dovetailed receiver. Simple adapters make Point Sight ideal for pistols, too.

- Fully adjustable for windage and elevation.
- Packed with extra reticles for shooters' preference.
- Far less expensive than other similar sighting systems.
- Requires no batteries.
- Eye relief: non-critical, parallax free
- Number of lenses: single
- Length: 4.46 in.
- Weight: 2.0 oz.
- Instructions included.

POINT SIGHT™ ADAPTERS

- Model 7852 Adapter Mount for Model 1200 Pistol. **sugg. retail $4.95**

- Model 7892 Point sight adapter for 92. **sugg. retail $4.95**

FIRST IN AIRGUNS.

1983: A WHOLE NEW DAISY.
In 1983 Daisy became a self-owned corporation for the first time in more than 25 years. The event inspired a flurry of innovation, including three new Power Line rifles, a whole new packaging program, a new line of ammo (along with the industry's first self-serve ammo packaging), a new shooting optics line, and even a whole new category of air-guns, Daisy Soft Air Gun detailed replicas.

THE SECOND HUNDRED YEARS.
One look at where Daisy has been will tell you a lot about where the airgun industry is going.

After all, we invented the industry. And no one is doing as much to ensure its future and your success. Open these pages and see for yourself. At Daisy, we're beginning our second century where we've always been. By putting our customers right where they belong. First.

RUKO®
1956-1986
30 YEARS SUPPLIER TO THE CANADIAN SPORTSMAN PRESENTS:

Daisy Softair Guns, detailed replicas of the most famous guns in shooting history. Replicas with an irresistable difference: they really work. Right down to ejecting "spent" shells.

Each model shoots .25 caliber plastic ammo at velocities lower than standard airguns. So they are great for indoor shooting. Yet they carry enough power to deliver good target groups. To top it all, you even will enjoy reloading your own ammo.

Whether you are a shooter or a collector, these realistic lifelike and extremely safe shooting Daisy replicas will bring you endless hours of fun and enjoyment.

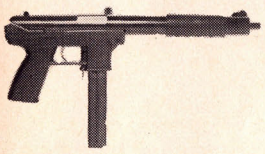
DAISY MODEL 59
An exact replica of one of the most acclaimed double-action 9mm automatic pistols made in America. Fires .25 caliber plastic shot loaded into plastic cartridges. Clip loaded, slide cocking action ejects spent shells.

DAISY MODEL 38
Fully detailed replica of the semiautomatic side arm issued to officers of the German Wehrmacht during World War II. Fires .25 caliber plastic shot from a 7-shot clip.

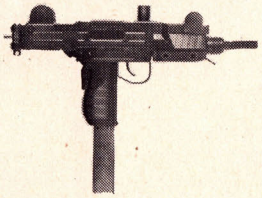
DAISY MODEL 09
A detailed replica of the official 9mm semiautomatic side arm recently adopted by the U.S. Armed Forces. Fires .25 caliber plastic shot from a 7-shot clip.

DAISY MODEL 45
Fully detailed replica of the .45 semiautomatic weapon that was the mainstay of the U.S. Armed Services for nearly 75 years. Fires .25 caliber plastic shot from a 7-shot clip.

DAISY MODEL 08
Authentic reproduction of the famous German 9mm, semiautomatic pistol in use during both World War I and world War II. Fires .25 caliber plastic shot loaded into plastic cartridges. Clip loaded, slide cocking action ejects spent shells.



DAISY MODEL 12
A detailed replica of the famous American-made semiautomatic weapon is packaged with ammo, cartridges and targets. Fires .25 caliber plastic shot, loaded into plastic cartridges from a 30-shot clip.

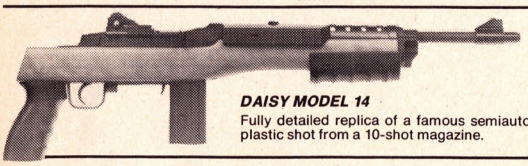


DAISY MODEL 13
Replica of the world famous Israeli semiautomatic assult pistol. Packaged with cartridges, ammo and targets. Fires .25 caliber plastic shot from plastic cartridges loaded into a 22-shot clip and ejects spent shells.

DAISY MODEL 15
Fully detailed replica of the German-made police weapon is packaged with cartridges, ammo and targets. Fires .25 caliber plastic shot loaded into plastic cartridges. Clip loaded pump ejects spent shells.

DAISY MODEL 04
Fully detailed replica of the classic .44 Magnum. Fires .25 caliber plastic pellets loaded into plastic cartridges. Cylinder swings out for easy loading.

DAISY MODEL 57
A detailed replica of one of the most acclaimed double-action .357 Magnum revolvers made in America. Fires .25 caliber plastic pellets loaded into plastic cartridges. Cylinder swings out for loading.



DAISY MODEL 14
Fully detailed replica of a famous semiautomatic rifle. Fires .25 caliber plastic shot from a 10-shot magazine.

DAISY MODEL 870
A fully detailed replica of the popular Remington® 870 "Wingmaster." Fires .25 caliber plastic shot from realistically styled mini-shotgun shells. Slide action ejects spent shells.

NOW, REAL AIR POWER STRIKES ON SILVER WINGS.

THE NEW Daisy® SINCE 1886.

Quick Silver™ Ammo

Daisy® Introduces Quick Silver™ Airgun Ammo. The name is Quick Silver. The new look of ultimate precision from Daisy, the real masters of air power. We've been making airgun ammo longer than anyone. Now, Quick Silver carries on our 50-year standard of ammo supremacy. With unique silver-finished B• Bs. and Pellets that prove significantly more accurate than the other leading brand in independent tests — using our guns *and* theirs. And CO_2 cartridges featuring Daisy's patented cap design. A design that virtually eliminates wear and tear on airgun puncture pins for longer CO_2 airgun life.

Quick Silver. For precision performance from any brand of airgun. New, from the airgun experts at Daisy. Insist on it.

Ruko scopes cover the entire spectrum of the shooting sport, from crossbows, air rifles and shotguns to rimfire and centerfire rifles and pistols, from standard to full view, from compacts to silhouettes.

Ruko offers you 5 ranges of scopes:

Ruko Alpha, Rubber armoured, Ruko Compacts & Ultra Compacts, Ruko Super Excellence and Ruko Electropoint. We offer the different ranges to satisfy the demand of those shooters who would like a quality scope at a reasonable price, for those who insist on the highest quality scope made today, and finally for the hunter and marksman who does not only want the best scope, but who wants it with a "light-up" reticle that will let him shoot in fading light and against dark background.

We have tried to give you all relevant specifications to help you make an intelligent choice, that will give you both the specific scope that will suit your individual needs and a lifetime of enjoyment of your favourite sport.

Open sight - Aperture sight - Riflescope: advantages & disadvantages
When you compare the three alternatives, a riflescope is by far the best of the three.

Open sight: Disadvantages: you have to line up the rear and front sight with the target. If your vision is not perfect, that poses a problem. With an open sight you obscure half of the target when you line up the sight. Advantages: Very maneuverable in bush hunting. Lower price than aperture sight or scope.

Aperture sight: Advantages: With an aperture sight you do not focus on the rear sight. You center your front sight on the target. Disadvantages: You still have some obstruction of your target through your sights.

Scopes: Disadvantages: Has some shortcomings in bush hunting. Advantages: You have a clear full sharp view of your target. It enlarges the target and brings it closer to your eye. Once you adjust the focus to your eyes, you are set for all times. A great advantage if your vision is no longer 20/20. We recommend that you use a scope.

Budget priced scopes for .22 rifles, air guns and air pistols.

Air rifle and .22 rifle shooting is mostly carried out at distances of 100 meters or less. Scopes require different characteristics.

The best magnification for short range shooters is between 1.5-4X power. Low power scopes offer a larger field of view, increased brightness and greater clarity of close targets. 2.5 or 3 power is the best magnification for rifles, and 1.5-2.5 power is the best for pistols.

SCOPE MOUNTS:
We carry a complete line of ⅞" & 1" ring mounts & bases from low to see-thru for air rifles, .22 cal. rimfire & centerfire rifles & pistols.

Ruko-Alpha Scopes for Hunting, Target, Silhouette
Crisp, sharp, bright edge to edge image, rugged construction, hard anodized, waterproof, fogproof, and shockproof. These high quality 9-11 lens system scopes compare in quality with the best known brand names on the market. Fully hard coated lenses increase light transmission up to 50% and produce a crisp, clear and sharp image that lets you zero in on your target fast. Permanently centered reticles guarantee the same point of impact. Positive ¼" click dials for windage and elevation can be easily adjusted with your thumb. Hard anodized finish protects the scopes from scratches. Neoprene eyeguard installed at the end of the eye piece provides you with an extra margin of safety. Yellow see-through lens caps are standard with every scope.

"ATG" BUILT-IN MOUNT
Adjustable Dovetail width - 6 to 15m/m

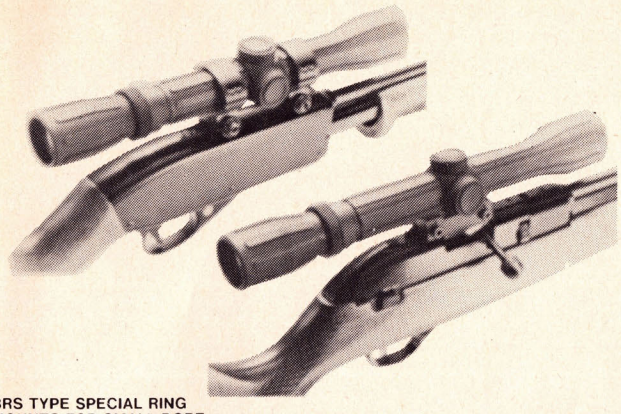
"ATG" (Adjust to Groove) Built-in Mount system enables following two special adjustments:

1) The clamp size adjusts to fit virtually any grooved receivers of airguns. Rimfire .22" cal. Rifles and other scope bases/grooves - ¼ to ⅝" (6 to 15m/m) wide.
2) The adjusted fastening of 4 Allen Screws for Clamping Plates, gives instant resolution to the "non-aligned Barrel and Receiver".

5 pairs of different length Spacer Bars enable the use of this mounting system with a variety of guns. Try some spacer bars to find the optimum pair allowing "the best fitness" when the mount is trially clamped onto the receiver or scope base of the gun.

RUKO® HAKKO "SUPER • EXCELLENCE"

for every type of shooting



BRS TYPE SPECIAL RING MOUNTS FOR SMALL-BORE

$19.75

BRB TYPE SPECIAL RING MOUNTS FOR BIG-BORE

$19.75

SOLID NO-SLIP POSITIONING: Special mounts, grooved to perfectly match the profile of the rubberized surface of the scope, lock the scope firmly into position.

RUKO HAKKO RUBBER ARMOR RIFLESCOPES

RUBBER ARMOR RIFLESCOPES

WIDE FULL-VIEW SYSTEM **8+1 OUTSTANDING FEATURES**

1. **WATER-PROOF:** The seamless, one-piece rubber tube employed assures a higher degree of airtightness than with any other conventional scopes.
2. **SHOCK-PROOF:** The thickness of rubber between scope and mounts eliminates recoil shock to the scope.
3. **SCRATCH & GLARE FREE:** The superior elasticity of coated rubber surfaces protects the surfaces from scratches and corrosion. The dull finish of the rubber tube prevents reflection of light to the shooter or game.
4. **FOG-PROOF:** Perfect hermetic sealing with Nitrogen Gas allows crystal-clear sighting without any "DIMMING" effect.
5. **PERFECT BONDING:** The cementing of rubber tubes with the aluminum scope is made exact and trouble-free, by the use of a super-strong permanent bonding material.
6. **REVERSE-LOCK EYEPIECES:** The unremovable eyepieces perfect a hermetic, anti-fogging seal, preventing possible breakage of reticle when the eyepieces are taken off.
7. One click moves the impact point ¼" at 100 yards.
8. Wide angle scopes with Full View optics.
9. Very affordable prices.

RUKO HAKKO SUPER EXCELLENCE

We are proud to offer to you one of the world's most outstanding lines of scopes ever made: Ruko-Hakko "Super Excellence", the end result of uncompromising attention to detail in all facets of the design and manufacturing process. Super Excellence is only achieved when advanced technology is coupled with unrelenting pursuit of perfection by dedicated craftsmen.

"Super Excellence" feature the monotube screw-on saddle (patent pending) — advanced technology in grinding and polishing of lenses — magnesium flouride coating — reverse lock eyepiece.

Mono Tube - screw-on saddle (Patent Pending), Rugged Construction
This unique manufacturing process guarantees unusual ruggedness, absolute waterproof and airtight bonding of the saddle to tube. Micro-precision centering of windage and elevation turrets ensures precise micro adjustments of windage and elevation.

Advanced Technology:
Hakko's advanced techniques in grinding, polishing, centering and coating of top quality lenses are not only used to produce the finest riflescopes ever made, but are also in great demand from leading Japanese camera manufacturers.

High Resolution Optics:
Each Ruko-Hakko "Super Excellence" scope assures you of the finest optical quality based on high resolution lenses for photographic clarity, sharp image, distortion-free bright optics, combined with effective magnesium flouride coating for maximum transmission of all available light.

Reverse-Lock Eyepiece and Neoprene Eye Safety:
To protect anti-fogging seal and accidental breakage of reticle, every eyepiece of the Ruko-Hakko "Super Excellence" scopes is equipped with reverse-lock device. The Neoprene eye guard installed at the end of the eyepiece provides you with an extra margin of safety.

Feature for feature, Ruko-Hakko "Super Excellence" scopes compare to and excel the most famous brand names on the world market.

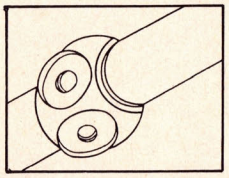
Here are 13 good reasons why you should buy Ruko Super Excellence:

- **Finest optical quality based on high resolution lenses.**
- **Fully magnesium flouride coated optics for maximum light transmission.**
- **Rugged construction ... Mono-tube, Screw-in saddle (Patented).**
- **Reverse-lock eyepiece to protect anti-fogging seal and accidental breakage of reticle.**
- **Neoprene eye safety.**
- **Nitrogen filled ... Fog-proof.**
- **Permanently centered reticle.**
- **Full-View in wide angle Number 15 scopes.**
- **Hard anodized finish ... Scratch-proof.**
- **Micro adjustment click stops. ¼" at 100 yards.**
- **Magnum-proof against heavy recoil.**
- **Waterproof.**
- **Yellow Haze filter caps.**
- **Affordable price.**

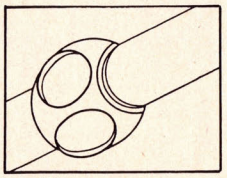
("ATG" Built-in Mount for .22 and Air Rifles)

RUKO HAKKO SUPER EXCELLENCE

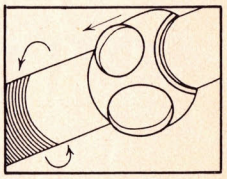
A rifle scope of superb quality that rivals the most famous brand names in the world, especially in price.



1. The unpunched saddle is screwed into the threaded part on the tube covered with a strong adhesive giving it double insurance of ruggedness.



2. The saddle is correctly positioned in place and is solidly bonded. This unique construction also allows a positive seal against fog and water seepage.



3. After being solidly bonded, necessary holes are machined through the saddle and tube in the area of elevation and windage turrets, securing the center of the scope.

"Electropoint Mark VIII" - The crosshair lights up

The revolutionary "Electropoint" features a reticle system that can be illuminated by turning a switch ring located in front of the focusing lens to the "on" position. Posts and dot are illuminated and allow for perfect aim under poor light conditions.

The following outstanding features of the Ruko-Hakko "Electropoint" Mark VIII are the result of the newest techniques employed, combining the latest photomechanical processes coupled with the finest etching techniques and the most effective integrations of optical and electronic concepts.

Lenses: Ultra sharp & bright. The lenses are made by the same people who make the lenses for the most renowned names in the optical field. The fully coated optical system allows for transmission of close to 100% of all available light, for superb image clarity.

Prism Reflection System: Reflecting elements are applied on the reticle center dot and lines, processed at a cemented surface of a pair of prisms. The other area is designed to allow maximum light transmission on to exit pupil.
This exclusive method of applying the light reflecting element only where and when it is needed allows maximum light gathering through the scope lenses and is not detrimental to the natural light adjustments made by the human eye.

The reticle, etched and vacuum-coated at the cemented surface of a pair of prisms, is dust and corrosion-free, keeping permanent high reflection of light. Daylight vision is unaffected. The reticle is lighted only when you need it, and the vivid scarlet colour of the post and dot is compatible with the human eye.

Waterproof & Fogproof: The use of precision parts only, carefully assembled under strict production and quality control, guarantees absolute waterproofing.

Shockproof: Recoil tested to withstand 1400 G's. Solid assembly of the component parts protects the scope from heavy recoil shock.

Long-Lasting Battery Life: The small 1.4V mercury battery lasts for 60 hours of use, and a replacement can be obtained from your dealer or any camera store.

The contacts of a special "lead switch" are permanently free from corrosion.

The reverse-lock eyepiece is rubber padded to protect the shooter against an accidental recoil blow.

Precise click windage and elevation adjustments are discernible by both sound and touch. Each click moves the point of impact ¼" at 100 yards.

- Widely usable with Shotguns, Rifles, Crossbows and Airguns

RUKO®

1956-1986
30 YEARS SUPPLIER TO THE CANADIAN SPORTSMAN PRESENTS:

FEATURES IN GENERAL:

a. BRIGHTNESS: Specially coated optics allow maximum light transmission and bright visibility (half mirror not used)
b. FIELD OF VIEW: Optically designed with 8 lens elements to have 4 times wider field than other makes
c. OPTICS: Highly accurate optical lenses employed
d. DIOPTRIC ADJUSTMENT: Movable focus system - Dioptic adjustment is possible by moving eyepieces back and forth. With this adjustment, image is sharp and reticle is clear.
e. ADJUSTMENT OF IMPACT POINT IS POSSIBLE
f. INTEGRAL SADDLE WITH TUBE
g. LEVELING OF GUN: Tilt of gun can be avoided as the reticles have horizontal guide lines or tapered posts.

All Ruko Electropoint Scopes have perma centered reticles. That is the reticle stays centered in the field of view. Windage or elevation adjustments do not move it. All reticles have individual eye focus adjustment with locking ring.

All Ruko scopes are covered by a warranty against manufacturing defects.
Our liability is limited to repair or replacement of the product only.

RUKO-HAKKO SUPER COMPACT SPOTTING SCOPES 20X50 POWER

(10 power & 30 power available as accessories. In crystal black finish or camouflage rubber armoured.) You will find the same meticulous care, precision engineering and superb quality of optics that have made Ruko-Hakko riflescopes so popular with hunters and sport shooters across Canada in our newest product: the new Ruko-Hakko Super Compact Spotting Scopes.

Only 185mm (7¼") long, the solid aluminum body (with built-in tripod adaptor) houses superb high resolution multi-coated high quality optics. The compact and rugged construction of the scope will endure heavy duty use. The heavy duty "Super Compacts" are also available in rubber armoured camouflage. Rubber armour prevents glare, metal to metal noise, protects the scope from any adverse weather conditions, and provides a sure grip.

Standard and rubber armoured, both Compact Spotting Scopes come complete with tripod, panhead lever and 235mm long (9¼") rubber-tipped non-slip adjustable legs. Scope and tripod fit snugly into a solid leather-covered carrying case (290mm/11½"x154mm/6"x89mm/3¼"). Colours: black or camouflage. Total weight 1350 gr. (3 lbs.). Scope and tripod only 850 gr. (1.88 lbs.).

PMC

Sporting Ammunition

Precision Made Cartridges and Performance

The purpose of this catalog is to provide shooters with the most useful and meaningful information about our products that is available to us. To do that, we have initiated new testing procedures and included information that is not usually offered in other ammunition catalogs. We think you'll find our new approach very useful and informative, and you'll see why we say PMC Ammunition is among the best you can buy.

Standard Deviation Information

To provide consistent accuracy, ammunition must provide consistent velocity from cartridge to cartridge. The only way to get consistent velocity is to make sure that every cartridge is precisely the same as the one before it, with identical powder charges, identical bullet weights, etc. PMC produces this type of critical consistency through precision manufacturing and strict quality control. If you chronograph our ammunition, you'll see that the difference in velocity between individual cartridges of the same caliber *averages less than 2%*. That is outstanding consistency by anyone's standards!

One of the best measures of the consistency of velocity is called Standard Deviation, a term which expresses the amount of overall variance from mean velocity exhibited by the cartridges tested. There's a rather complicated formula used to determine Standard Deviation, but in examining the charts in this catalog, all you have to know is that a score of 20 is considered to show excellent consistency in velocity and accuracy.

Practical Ballistics Information

Most companies furnish ballistics information that they've obtained by firing their ammunition in pressure guns. That's fine, but it doesn't tell you what you can expect when you fire it through *your* gun. Pressure guns aren't made like the gun you hunt with, or shoot targets with. The actual ballistics you get from your personal gun just won't match those from a pressure gun.

To make our ballistics information more meaningful to the average shooter, we obtained it by actually firing the ammunition through guns that are the same as, or closely related to, the guns owned and used by the average hunter or shooter. What you see in our ballistics charts will be very close to what you can expect from your own gun. And that, in our opinion, makes it much more useful to you.

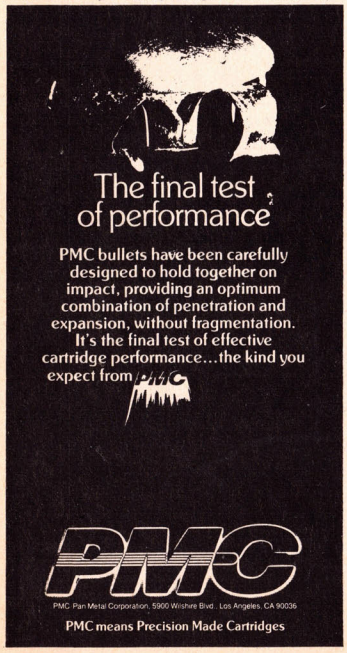
Bullet Path Information

Our ballistics charts now offer information on Bullet Path, which will be extremely useful to you in sighting in your gun. For instance, when your gun is sighted in for 200 yards, the chart will tell you exactly where the bullet will strike at distances ranging from zero to 500 yards.

Reaching for Perfection

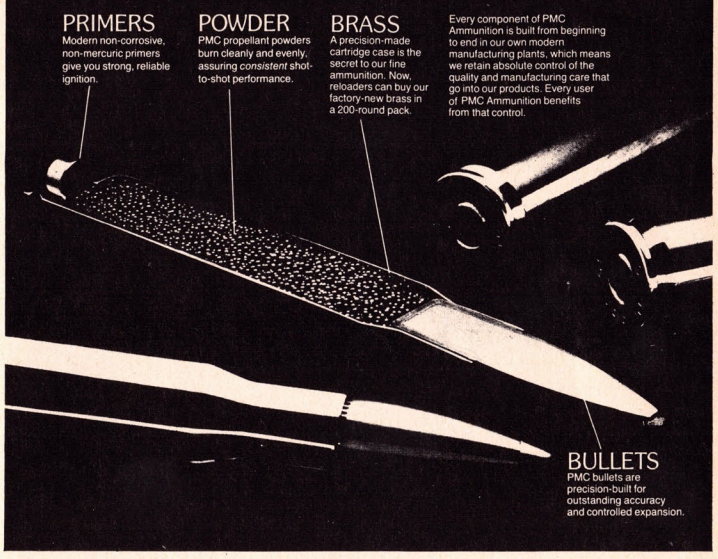
When we make PMC Ammunition, our manufacturing objective is to produce a product that is close to perfection from shot to shot. We define perfection as the point where trajectory never changes and the velocity is the same every time you pull the trigger. Of course, no manufacturer has managed to reach perfection yet, but at PMC, we've taken huge steps toward narrowing the gap.

The precision and precise repetition of our manufacturing process give you identical, reliable performance in every box of ammunition. You can rely on PMC, whether you're shooting at targets, knocking over silhouettes or when you only have one chance to make the big game shot of your life.



The final test of performance
PMC bullets have been carefully designed to hold together on impact, providing an optimum combination of penetration and expansion, without fragmentation. It's the final test of effective cartridge performance...the kind you expect from PMC
PMC
PMC Pan Metal Corporation, 5900 Wilshire Blvd., Los Angeles, CA 90036
PMC means Precision Made Cartridges

Top quality components, total quality control and more than a quarter century of manufacturing experience go together to rank PMC Ammunition among the finest in the world.



PRIMERS
Modern non-corrosive, non-mercuric primers give you strong, reliable ignition.
POWDER
PMC propellant powders burn cleanly and evenly, assuring *consistent* shot-to-shot performance.
BRASS
A precision-made cartridge case is the secret to our fine ammunition. Now, reloaders can buy our factory-new brass in a 200-round pack.
Every component of PMC Ammunition is built from beginning to end in our own modern manufacturing plants, which means we retain absolute control of the quality and manufacturing care that go into our products. Every user of PMC Ammunition benefits from that control.
BULLETS
PMC bullets are precision-built for outstanding accuracy and controlled expansion.

PMC "PRECISION MADE CARTRIDGES" ***PRECISION MADE CARTRIDGES Make Every Shot Count!***

**Copperplated

1 = JSP (Jacketed Soft Point); excellent expansion and penetration. **2** = JHP (Jacketed Hollow Point); maximum expansion. **3** = JHP + P; High Pressure Load, Jacketed Hollow Point. Use only in handguns manufactured to handle + P loads, in accordance with manufacturer's recommendations. **4** = RN (Round Nose Lead); unjacketed, good penetration. **5** = WC (Wadcutter); unjacketed flat-top lead for target shooting. **6** = SWC (Semi-Wadcutter); economical lead target or defense load. **7** = FMJ (Full Metal Jacket); copper clad lead for maximum penetration and best feeding in auto pistols.

can get "the Best for Less!"

PMC
The World's Fastest Growing Ammunition

Consistent ballistic performance is what produces the trajectory you need for tight groups. It's what you expect from the best factory ammunition, and it's what you get from PMC.

Introducing The Mini-Pak®
PMC's pocket-perfect 10-cartridge package

How many times have you stopped while hunting to rearrange the loose cartridges in your pocket because you were afraid their clinking would announce your presence to every game animal in the vicinity? Now, that problem is solved. PMC's new Mini-Pak holds ten cartridges in its styrofoam insert, and it's perfectly sized to slip into your pocket—even a shirt pocket!

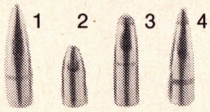
***Standard Deviation.** As used with regard to the measurement of the performance of PMC Ammunition, standard deviation refers to the degree of consistency in velocity shown by the ammunition during testing. For your purposes in comparing the standard deviation scores in this catalog, a rating of 20 or less is considered to show excellent consistency in velocity and, therefore, accuracy.



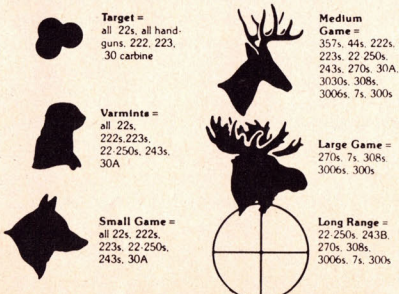
1 = FMJ (Full Metal Jacket); spitzer
2 = FMJ (Full Metal Jacket); round nose
3 = SP (Soft Point)
4 = PSP (Pointed Soft Point)

Whether you're hunting, knocking over silhouettes or punching paper, PMC equals or exceeds all others in power and accuracy.

The PMC 24-Pack
.223 (5.56) Ball Ammo
480 Cartridges

If you do a lot of shooting, this offer is made to order — buy just two dozen boxes of excellent PMC Target .223 ammunition, and a top-quality, waterproof, heavy gauge steel ammunition can comes with it. Use it to store your ammunition or anything else that needs protection from the elements. It's a super package for heavy shooters, and it's only from PMC.

These symbols indicate the usual best use for the cartridge and bullet listed. Hand loading or variances in weather conditions can affect these data. We recommend use of a standard ballistics chart as a final authority.



Target = all .22s, all handguns, .222, .223, .30 carbine

Varminte = all .22s, .222s,.223s, .22-250s, .243s, .30A

Small Game = all .22s, .222s, .223s, .22-250s, .243s, .30A

Medium Game = .357s, .44s, .222s, .223s, .22-250s, .243s, .270s, .30A, .303Os, .308s, .3006s, .7s, .300s

Large Game = .270s, .7s, .308s, .3006s, .300s

Long Range = .22-250s, .243B, .270s, .308s, .3006s, .7s, .300s

Stock up for the big hunt...now

At PMC, we build 22 ammunition with the same kind of care and precision we put into our centerfire cartridges. That means you can't buy a better 22.

Zapper Ballistics	Caliber	PMC Load #	Bullet Type	Weight (grains)	Muzzle Velocity	Muzzle Energy		Barrel Length	Test Gun	Sugg. Retail

Zapper is new, but already it is impressing shooters with its excellent accuracy and reliability. Zapper is available with either lubricated lead or copper coated bullets, and comes in a standard 50-round box, 500-round brick, or the new 250-round Mini-Brick that's just right for the target shooter, weekend plinker, or small game hunter who wants to make sure he's ready for the season.
Give Zapper a try, and you'll see why we say the quality and manufacturing care really show up in the results you get. Best of all, you'll find out that quality ammunition doesn't have to be high-priced!

Zapper 22
Hard-hitting, extremely accurate 22 ammunition for the hunter or target shooter

Precision Made Brass Cases for Reloaders

PMC brass cartridge cases are now available to reloaders in a handy 200-round pack. They're among the finest available to reloaders, because we use only the best quality raw materials and maintain strict quality control during the manufacturing process. All PMC cases are made in our own modern brass milling facilities—your assurance that each case mouth has been properly annealed, each primer pocket formed to rigid specifications, and every case wall drawn to exact dimension for maximum strength and long reloading life. When you buy PMC brass, you're buying the best.

Ruko gun cases: Super quality at an affordable price.

What should you expect from a gun case? It should protect your gun from nicks and scratches. It should shelter your gun from rain, sleet and snow. It should have the right length and shape for your particular gun or rifle. It should give you a balanced feel when you carry your gun. It should be made of materials that give you a lifetime of service.

What do Ruko gun cases deliver? For the outer shell we chose 840 super tough waterproof Nylon Duck in our Deluxe cases and 420 heavy duty waterproof Oxford Nylon in our economy line, to make it an "All Weather" case. We used 12.5mm (½") and 25.4mm (1") foam padding (not sponge) and strong flannel lining on the inside to protect your gun from bruises and scratches. We used a full length #5 Durlin Nylon zipper to make it easier for you to take the gun out and put it back. We used a 39mm (1½") wide heavy duty Nylon web belt and made a wrap around handle that will never tear or break. All in all, we made a very tough gun case that will deliver what you expect, and give you a lifetime of service (if not misused).

MODEL NUMBER & DESCRIPTION

GO10-1: Case for rifles with scope. Made of 840D super tough waterproof Nylon Duck, 25.4mm (1") extra thick foam padding, strong interior flannel lining. No. 5 full length Durlin zipper. Colour is tan with navy blue saddle, heel & tip. Wrap around matching web-belt handle is guaranteed not to rip. Comes with hanging ring & leather identification pocket. Sizes 40"-48". **Sugg. Retail $34.95.**

GO11-1: Case for shotguns & rifles without scopes. Other specifications same as G010-1. Sizes 44"-55". **Sugg. Retail $34.95.**

GO10-3: Case for rifles with scope. Heavy duty waterproof Oxford Nylon with 15mm (⅝") foam padding, strong interior flannel lining. No. 5 full length Durlin zipper. Colour is tan with matching brown saddle, heel & tip. Wrap around heavy duty web-belt handle. Comes with hanging ring and leather identification pocket. Sizes 40"-48". **$24.95**

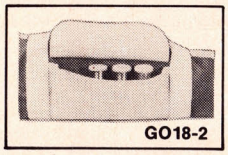
GO11-3: Case for rifles & shotguns without scope. Other specifications same as G010-3. Sizes 40"-52". **$23.95**

GO10-6: Cotton canvas case for rifles with scope, made from 10 oz. cotton with ½" foam padding and strong interior cotton lining. Full length No. 5 Durlin zipper. Colour is chocolate brown with dark brown trimming & heavy duty web belt wrap around handles. Comes with hanging ring & leather identification pocket. Sizes: 42", 44", 46" & 48". **Sugg. Retail $26.95.**

GO11-6: Cotton canvas case for shotguns & rifles without scope. Other specs same as GO10-6. Size: 52". **Sugg. Retail $26.95.**

GO11-4: Camouflage case for rifles and shotguns without scope. Made of 420D camouflage heavy duty Oxford Nylon with 15mm (⅝") foam padding & interior flannel lining. No. 5 full length Durlin zipper. Matching full wrap around heavy duty web-belt handle. Comes with hanging ring and leather identification pocket. Sizes 48" & 52". **Sugg. Retail $25.95.**

GO12: 54" shotgun case with extra compartment for mobilechoke barrels & barrels of 32" length (with zipper). Made of super tough 840D waterproof Nylon Duck. The compartments are corduroy lined. Padding is 15mm (⅝") foam. The compartment for the barrel has extra elastic straps to hold 3 mobilechokes & key, with a corduroy flap for extra protection. Colour is tan with matching brown heel & tip made of leather. Comes with luggage type handle & adjustable shoulder strap. No. 5 full length Durlin zipper. Also comes with hanging ring & leather identification pocket. **Sugg. Retail $39.95.**



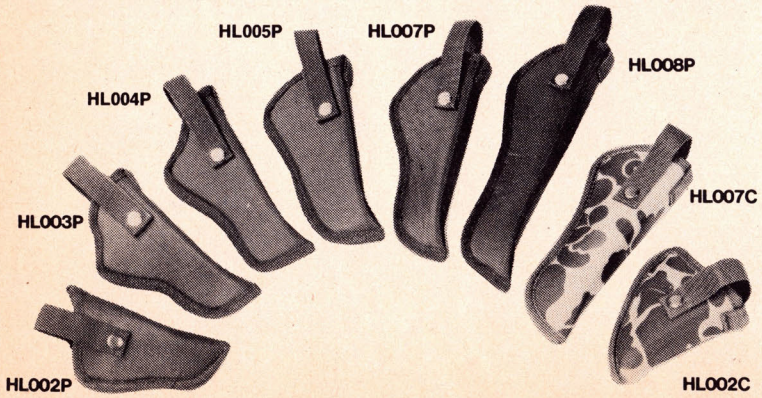
GO18-2

GO18-1: Special case for all shotguns with mobile chokes, made from 1000D super tough waterproof Nylon Duck. 25.4mm (1") extra thick foam padding & strong interior flannel lining. No. 5 full length Durlin zipper. Extra pocket located on the outside between wrap around handles will hold 4 chokes & the wrench, plus small extras. Colour is brown with beige pocket, wide ½" wrap around web belt handles & trimming. Comes with hanging ring and leather identification pocket. Size: 50". **Sugg. Retail $37.95.**

GO22-1: Same as GO18-1 case for rifles with scope. Made of 1000D super tough waterproof Nylon Duck with 25.4mm (1") extra thick foam padding & strong interior flannel lining. No. 5 full length Durlin zipper. Extra 8"x5" pocket between handles. No elastic loop, velcro across whole flap. Saddle and ends to be dark brown. Pocket, handle and body of case to be beige. Comes with hanging ring and leather identification pocket. Size: 46". **Sugg. Retail $42.95.**

Ruko gun holsters to fit all the most popular sizes and brands of revolvers and pistols.

Made of tough 420D Ballistic Nylon fused to the outside of a 5 EVA shock absorbent core with a smooth 70D Nylon lining fused to the inside. Piping and head are reinforced with heavy webbing. 2" wide heavy web Nylon belt loop accommodates belts up to 2" wide. Side arm is secured by 1" indefinitely adjustable Nylon web strap.



HOLSTERS

All made of 420D Nylon Oxford.

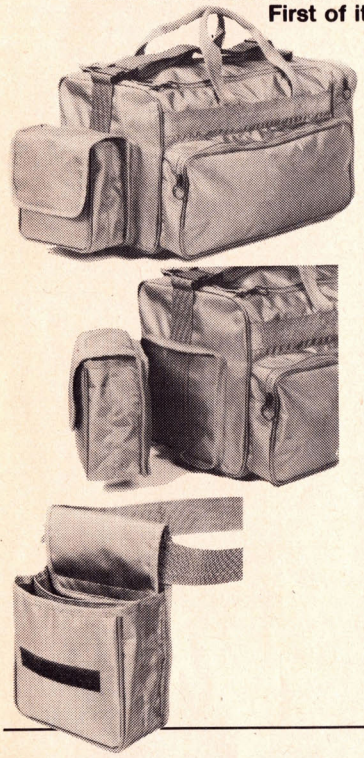
"New for 1986"

RUKO SHOOTER'S TRAVELLING COMPANION

First of its kind in the world.



Specially designed to carry ammo and personal belongings to your favourite hunting spot or target range.

Quality Materials: The Ruko Shooter's Travelling Companion is made of 420D waterproof Oxford Nylon with all pockets rubberized on the inside to keep rain and sleet on the outside.

New Unique Construction: A special PE board with PVC covering and a collapsible 3" high frame give the main compartment (18" long, 11" wide and 11" high) extra carrying strength and stability. Whether you carry a whole case of shotgun shells (20 boxes) or just half a dozen boxes, the bottom of the bag will not sag. An 8" wide top flap with double zippers gives you extra easy access to the main compartment.

Additional Features: Double web belt nylon wrap around handle and 1½" heavy nylon web reinforcements on all strategic parts of the bag make carrying even the heaviest loads more comfortable and give the bag extra strength.

Additional Storage: The bag has 2 extra pockets, one 18"x7"x2" on the side, and one 11½"x11"x3" at the head of the bag. Both are rubberized and will keep your personal belongings dry even under the most adverse weather conditions.

New Exclusive Feature: The unique feature of the Ruko Shooter's Travelling Companion is a shotshell pouch that rides piggy-back on the heel of the bag, attached by a zipper. When you want to use the shotshell pouch, just unzip it and unsnap the quick detachable 2" heavy duty Nylon web carrying strap. The strap doubles as a belt for the shell pouch. The completely rubberized shell pouch features double compartments and wide velcro strip to lock the flap securely.

Colour: The Ruko Shooter's Travelling Companion is available in Olive Green and Black.

We have spared neither thought nor money to bring you the best designed and best constructed shooter's bag you have ever seen. We hope one will accompany you soon, and will become your indispensible travelling companion. **Sugg. Retail $59.95.**

#096 - Hunting vest of top quality heavy duty cotton in green and orange (top portion is bright orange for safety). Removable game bag fastened with 3 velcro strips on each side. Cartridge loops for 22 shells. Vest is reversible to green only. Front breast pocket and 2 large lined and zippered side pockets.

Vest Sizes: Size 2 - small, Size 3 - medium, Size 4 - large, Size 5 - extra large. **Sugg. Retail $72.95.**

RUKO®
1956-1986
30 YEARS SUPPLIER TO THE CANADIAN SPORTSMAN
PRESENTS:

Ruko classic style hunting knives

made by the world's most renowned cutlery centre — Solingen in Germany and

"RUKO SHARK" the floating filleting knife

"RUKO SHARK"

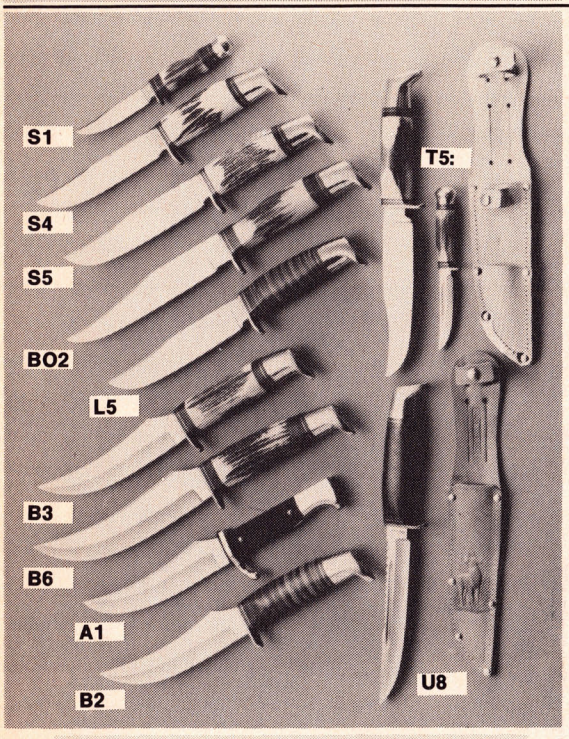
A superior quality precision designed cutting instrument conceived and constructed especially for the fisherman, camper and boater. Each knife features a sleek, non-slip handle to fit the hand comfortably. Molded of tough polypropylene, the Shark knife is unsinkable. The orange cap makes it easily visible when it floats in the water. The hollow ground razor sharp blade is forged from high tensile molybdenum stainless steel (56-57 Rockwell). There are three versions of the Ruko Shark knife available: the Filleting knife, the Sportsman and the Skinner.

Ruko Shark filleting knives; with hollow ground flexible blade & razor sharp cutting edge. The filleting knife comes with a patented spring-lock sheath that clips to your belt, boot, trouser pocket, etc.

RSH5 - 5″ flexible filleting blade sugg. retail $15.95
RSH6 - 6″ flexible filleting blade sugg. retail $16.95
RSH7 - 7″ flexible filleting blade sugg. retail $21.95

Ruko Shark Sportsman knives with rigid hollow ground blade & razor sharp cutting edge. The Sportsman & Skinner sheath is a one piece molded scabbard and belt loop, with a special knife handle locking loop.

RS21 - 4½″ curved skinning blade sugg. retail $12.95
RS22 - 5″ all purpose blade sugg. retail $12.95



All Ruko hunting knives are made in the worlds most famous cutlery centre, Solingen Germany. Forged to our specifications from high grade carbon cutlery steel. The expertly finished, tempered blade is tested to maintain an ideal Rockwell hardness of 56-57 for the best hardness to toughness ratio. Their sharpness can easily be felt by the familiar thumb over the edge stroke test. Ruko knives have full man size handles, solid, thick brass hand-guards and specially designed non-slip knobs. All come complete with sturdy top quality leather sheath and sharpening instructions.

Buffalo Skinner Series, in bake-lite, genuine leather or genuine stag handles. Every knife comes with a top grain cowhide leather sheath. The razor sharp blade is hollow ground.

Ruko Elite Knives

Tough enough for the rugged outdoors. Handsome enough for the executive suite.

RUKO®
1956-1986
30 YEARS SUPPLIER TO THE CANADIAN SPORTSMAN
PRESENTS:

Presented in these pages is a collection of superbly designed knives with the look and feel of custom made knives.

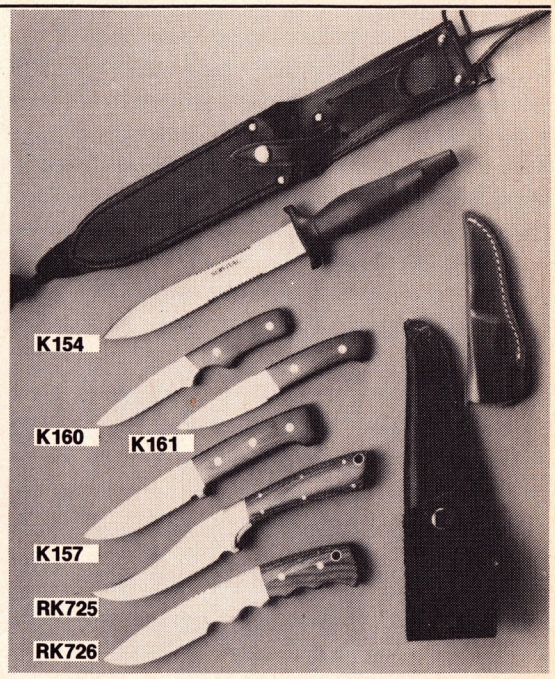
Each knife in the Ruko Elite Series features a razor sharp blade made from chrome vanadium AUS 6 or AUS 8 stainless steel. This is an extremely high carbon steel, known for its super hardness (RC57-59) and superior edge holding capabilities. The knife handles have been carefully contoured to fit the hand comfortably and securely, with flawless alignment of inlay and frame (or bolster depending upon the model).

Classic styling, superior quality and meticulous workmanship are the hallmark of every knife.

The Ruko Survival Knife Model 154:
Heavy duty double edged blade is made of 440 stainless steel, with a Rockwell hardness of C54-56. Handle is of cast aluminum, specially coated with a coarse epoxy finish for a sure non-slip grip. Comes complete with a tough cowhide leather sheath K154 $39.95

Ruko Elite Fixed Blade Hunting Knives
The RK700 series and the K100 series, our Super Deluxe Fixed Blade Hunting Knife lines. Superbly designed knives, they have the look and feel of being custom made. Each component is flawless in construction, only the best materials have been used. From the butt of the wood grained micarta handles to the tip of a razor sharp blade, each knife speaks of uncompromising quality. Only when you feel one in your hand will you appreciate the high degree of craftsmanship that has gone into each knife.

RK725 Buffalo Skinner, blade 117mm 4⅝" $79.95
RK726 Hunting knife - blade 95mm 3¾" $59.95
K157 drop point hunter 95mm 3¾" $47.95
K160 drop point hunter 80mm 3⅛" $39.95
K161 Skinner type 73mm 2⅞" $39.95



Ruko Elite Lock Blade Pocket Knives
Our 007 lock blade series is a study in perfection. Except for the 6 beautiful tropical rosewood inlays in the outer stainless steel frame, every part is made of stainless steel, including the razor sharp high carbon molybdenum blade and the knife spring. The satin finish of the knife is so smooth it feels like velvet. We are sure you will treasure one of the 4 sizes it is available in.

007 blade 65mm 2½" $18.95
008 blade 45mm 1¾" $19.95
009 blade 65mm 2½" $26.95
010 blade 70mm 2¾" $29.95

Ruko Elite 9000 Series Lock Blade Pocket Knives
Distinctive styling, smooth flawless lock blade action, perfect wood to metal fit, are all signs of superior craftsmanship. Add AUS6 molybdenum stainless steel blades honed to razor sharp perfection and you have a lock blade knife that will give you years and years of service. The satin finished stainless steel bolsters and ebony wood scales make a perfect match. You can choose from two distinctive styles and 3 sizes.

9100 blade 76mm 3" $29.95
9110 blade 57mm 2¼" $27.95
9120 blade 47mm 1⅞" $24.95
9200 blade 76mm 3" $29.95
9210 blade 57mm 2¼" $27.95
9220 blade 47mm 1⅞" $24.95

P2000: This handsome lock blade weighs more than half a pound and is more than ½ an inch thick. Its weight comes from the high quality materials and construction. The 3¾" 95mm blade is made from AUS 8 stainless steel, and the solid brass bolsters with rich tropical hardwood inlay give this knife tremendous strength and beauty. There is even a lanyard hole that will accept a leather thong to prevent accidental loss. Comes complete with top grain belt sheath in a choice of two styles and colours. (sheath models 8005 or 8016) $49.95

P1000: Like the P2000 this knife is thick and strong. The frame is made from brushed stainless steel with micarta inlays. The 75mm (3") drop point blade is made from AUS 8 stainless steel. $39.95

6200M: Features a 76mm (3") 440 vanadium stainless steel blade with a brushed stainless steel frame and rosewood inlay. This knife also has a lanyard hole. $28.95

6200S: A smaller version of the 6200M with 54mm (2⅛") 440 vanadium stainless steel blade with brushed stainless steel frame and rosewood inlay. $24.95

9400F: A functional beauty that sports an etched hunting scene on the 60mm (2⅜") drop point blade. Made from AUS 8 stainless steel. The polished bone inlay is set off by a brushed stainless steel frame. $39.95

IK620: A medium size folder with strong clean lines. Features a 58mm (2¼") drop point forged from AUS 8 stainless steel. A solid brass frame and liners is enhanced by a white micarta inlay. $29.95

The VICTORINOX Swiss Army Knife a Standard of Value

The most versatile knife you could ever buy. Some call it a tool box. Shown here are the most popular models of the most famous pocket knife line in the world — Victorinox. It has become a household word and a standard of value for international corporations. Prime Computer, USA, among others, boasts that it's hardware has become as versatile as a Swiss Army knife. Go and see it in your favourite store. Retail prices range from below $10.00 to over $50.00.

GARANTIE LIMITÉE

RUKO® DU CANADA LIMITÉE garantit à l'acheteur au détail d'origine pendant une période d'un (1) an à compter de la date d'achat que chaque arme à feu vendue par nous sera exempte de défaut de matières premières et de fabrication. Notre obligation en vertu de cette garantie sera limitée au remplacement et à la réparation de toute arme à feu ou de ses parties quelconques qui nous auront été retournées (en port payé) et auxquelles un défaut de matières premières ou de fabrication aura été constaté. Ce service sera fourni gratuitement en ce qui concerne les pièces et la main-d'oeuvre se rapportant aux revendications en vertu de la garantie qui sont conformes aux exigences, y complis l'avis exigé, de cette garantie.

Pour que l'acheteur d'origine se prévale de la protection offerte par cette garantie, il doit aviser RUKO® DU CANADA LIMITÉE du défaut de matières premières et/ou de fabrication. Ledit avis doit nous parvenir au plus tard un mois après que l'acheteur ait découvert le défaut et, en tout cas, au plus tard un (1) an suivant la date d'achat. Après avoir reçu un tel avis, RUKO® DU CANADA LIMITÉE enverra à l'acheteur des instructions visant l'envoi de l'arme à feu.

Cette garantie limitée est la seule garantie explicite offerte par RUKO® DU CANADA LIMITÉE. RUKO® DU CANADA LIMITÉE n'offre aucune autre garantie explicite, que ce soit dans le manuel d'instructions, dans les annonces ou ailleurs.

La durée de la garantie implicite, y compris toute garantie de valeur marchande ou d'aptitude des marchandises à satisfaire certaines fins particulières, sera limitée à une période d'un (1) an à compter de la date d'achat.

LIMITE DE RESPONSABILITÉ

LES PISTOLETS, REVOLVERS, CARABINES, FUSILS, PISTOLETS À AIR ET CARABINES À AIR sont classés comme étant des armes à feu ou des ARMES et ils sont vendus par nous à la condition expresse que nous ne soyons aucunement tenus responsables de leur manipulation ou revente sécuritaire en vertu des lois et des règlements régionaux. RUKO® DU CANADA LIMITÉE ne sera pas responsable de quelque façon que ce soit du mauvais fonctionnement de l'arme à feu, des blessures ou des dommages matériels découlant en tout ou en partie de ce qui suit:

1 - Déchargement intentionnel ou négligent,
2 - Manipulation incorrecte ou imprudente,
3 - Modifications non autorisées,
4 - Munitions non standard, défectueuses, incorrectes, rechargées ou chargées à la main,
5 - Corrosion,
6 - Négligence ou
7 - Autres influences échappant à notre volonté directe et immédiate.

Certe limite est valide, que la responsabilité soit revendiquée ou non en vertu d'un contrat, de la négligence ou d'une obligation exacte (y compris tout défaut d'avertissement).

RUKO® DU CANADA LIMITÉE décline toute responsabilité à l'égard des dommages fortuits ou indirects, tels qu'une perte d'utilisation d'un bien, une perte commerciale ou une perte de revenu ou de bénéfices en vertu d'un contrat, de la négligence ou d'une obligation exacte.

AVERTISSEMENT:

L'utilisation de munitions rechargées, chargées à la main ou non standard annule les garanties. Le rechargement est une science et les munitions rechargées incorrectement ou chargées à la main et les autres munitions non standard peuvent être très dangereuses, endommager l'arme à feu et causer des blessures graves au tireur ou à d'autres personnes. Utilisez seulement des munitions originales fabriquées à l'usine et de haute qualité qui sont en bon état et du genre et du calibre pour lesquels votre arme à feu a été conçue.

RENSEIGNEMENTS SUPPLÉMENTAIRES:

RUKO® DU CANADA LIMITÉE se réserve le droit d'apporter des changements en tout temps, sans avis, à la conception et aux caractéristiques des armes à feu, d'ajouter et d'enlever des accessoires et d'ajouter ou d'abandonner des modèles sans aucune obligation de sa part.

LIMITED WARRANTY

RUKO® OF CANADA LIMITED warrants to the original retail purchaser for a period of one (1) year from date of purchase that each firearm sold by us will be free from defects in materials and workmanship. Our obligation under this warranty shall be limited to replacing or repairing any firearm or part thereof returned (prepaid) to us and found to be defective in either material or workmanship. This service will be provided free of any charge for parts or labor in connection with warranty claims meeting the requirements, including the notice requirement, of this warranty.

In order for the original purchaser to avail himself of the protection of this warranty, he must give RUKO® OF CANADA LIMITED notice of the defect in materials and/or workmanship which notice must be received by us within one month after discovery by purchaser of the defect, and in any event within one (1) year from date of purchase. After such notice is received, RUKO® OF CANADA LIMITED will send the purchaser instructions for shipment of the firearm.

This limited warranty is the only express warranty made by RUKO® OF CANADA LIMITED. RUKO® OF CANADA LIMITED makes no other express warranty, whether in the instruction manual, advertising or elsewhere.

The duration of any implied warranty, including any warranty of merchantability or fitness for a particular purpose, shall also be limited to a period of one (1) year from date of purchase.

LIMITATION OF LIABILITY:

PISTOLS, REVOLVERS, RIFLES, AIR RIFLES, AIR PISTOLS AND SHOTGUNS are classified as firearms or WEAPONS and are sold by us with the specific understanding that we are not responsible in any manner whatsoever for their safe handling or resale under local laws and regulations. RUKO® OF CANADA LIMITED shall not be responsible in any manner whatsoever for malfunctioning of the firearm, for physical injury or for property damage resulting in whole or in part from:

1 - Intentional or negligent discharge,
2 - Improper or careless handling,
3 - Unauthorized modifications,
4 - Defective, improper, reloaded, handloaded, or non-standard ammunition,
5 - Corrosion,
6 - Neglect or
7 - Other influences beyond our direct and immediate control.

This limitation applies regardless of whether liability is asserted on the basis of contract, negligence or strict liability (including any failure to warn).

Under no circumstances shall RUKO® OF CANADA LIMITED be liable, whether in contract, negligence or strict liability, for incidental or consequential damages, such as loss of use of property, commercial loss and loss of earnings or profits.

WARNING:

Use of reloaded, handloaded, or other non-standard ammunition voids all warranties. Reloading is a science and improperly reloaded or handloaded ammunition or other non-standard ammunition can be very dangerous, damage the firearm, and cause serious injury to the shooter or to others. Use only high-quality, original factory-manufactured ammunition in good condition and of the type and caliber for which your firearm was designed.

FURTHER INFORMATION:

RUKO® OF CANADA LIMITED reserves the right to make changes at any time, without notice, in the design or specification of firearms, to add or remove accessories and to add or discontinue models without incurring obligation.

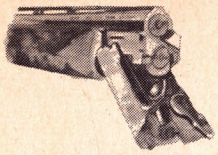
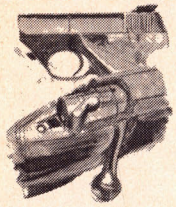
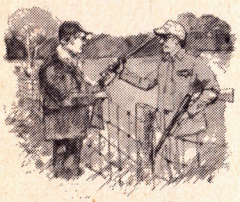
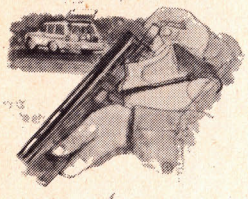
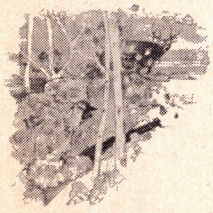
PMC brochure	$1.00
Daisy Indiv. pamphlets	$1.00
Tikka brochure	$1.00

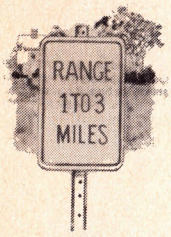


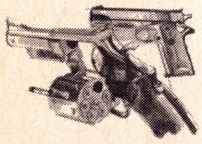


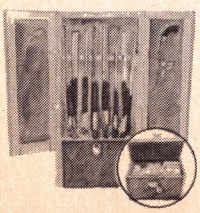












FIREARMS SAFETY

You, the shooter, you are the key to firearms safety. From the time you pick up a firearm you become part of it. You are in control. Whether the firearm is safe or not depends on you, not the firearm. A firearm does not load itself, it does not aim itself, it does not pull the trigger by itself, nor does it repair or alter itself. You are at the controls. Firearms safety depends on you, make no mistake about it.

The shooting sport is one of the safest sports. It is in your own interest and in the interest of all shooters to keep it that way and to make it even safer. Here are a few rules which are intended to re-emphasize and re-affirm safe gun handling and storage. Read them over and over again, discuss them with your friends, be always mindful of them.

1. Read your firearms instruction manual. Don't alter or modify your gun. Have your gun checked regularly by a competent gunsmith or factory warranty station.

2. Never handle a gun without opening it yourself to check and see if it's loaded. Always play it safe — your life and the life of others depends on you.

3. Don't rely on your gun's safety. Treat every gun as if it were loaded and ready to fire. The safety on any gun is a mechanical device that serves as a part of a complete system of safe gun handling. The safety is not intended to serve — nor can it possibly serve — as a substitute for common sense or safe gun handling.

4. Never cross a fence, climb a tree or jump a ditch with a loaded gun. Anytime there is an added risk that you might lose your balance and drop or lose control of your gun, you should unload.

5. Never load or carry a loaded gun until you are ready to use it. One of the cardinal rules of shooting safety is to load your gun only when ready to use it — and to unload it as soon as you are through.

6. Watch your muzzle so the other fellow doesn't have to. If everyone handled his gun so carefully that the muzzle never pointed at something the gunner didn't intend to shoot, we'd have no firearm accidents. It's as simple as that, and it's up to you.

7. Don't shoot unless absolutely sure of your target and what is beyond it. You can't call a bullet back and you can not run after it and change it's direction.

8. Know the range of your gun. Remember, even a .22 rimfire can travel over one mile. All shooters hope they will hit what they are aiming at when they pull the trigger. Safe shooters also consider where their shot might go if they miss. A .22 short can travel 1¼ miles, and a high velocity cartridge such as a 30-06 can send its bullet more than 3 miles. Shotgun pellets can travel 500 yards, and shotgun slugs have a range of one-half mile. And pellets fired from a high power air rifle will also travel up to 600 yards.

9. Always be sure the barrel is clear of obstructions . . . and only carry ammunition specifically intended for the gun you are using. Never allow different types of ammunition to get mixed up in the pockets of your hunting or shooting coat.

10. Always wear eye and ear protection when shooting. Nobody can replace your eye or bring your hearing back.

11. Always carry handguns with the hammer down on an empty chamber. Still better, unload after you are through with shooting. Always empty your gun before you carry it into a house, car, boat, etc.

12. Keep guns and ammunition separately and in locked storage. There's really only one basic way to safely store guns and ammunition. They should both be kept locked separate from one another, with the keys under the control of a responsible adult.

13. And last a tip that will save you dollars and makes sense: Before you store your gun away, clean it thoroughly. Never store it in your gun case that you took out hunting. Make sure your place of storage is dry and well ventilated. Moisture and humidity will destroy the bluing and the gun. And that is costly.

Use your common sense at all times, and enjoy your favourite sport.
